

gLite 3.2 Support Policy

- gLite 3.2 follows the [EMI Support Policy](#)
- gLite 3.2 is in “standard support” until the end of October 2011
 - standard support means that the component has been replaced by a new major version
 - it is maintained but not actively developed
 - it may receive fixes and functional changes of high priority according to their severity, impact and cost
 - → focus on stability rather than enhancement of the provided functionality

- If a gLite 3.2 service is stable **no** updates unless they are related to security or critical fixes
- Recommendations
 - Careful setting of “priority” field of GGUS tickets when requesting a bug to be fixed to properly reflect its criticality
 - Notify the OMB about requested bug fixes that should be fixed in gLite 3.2
