

# ARGUS gLite 3.2

## Support calendar

- The [gLite 3.2 support](#) policy applies
  - end of standard support: Oct 2011
  - end of security support: April 2012
- For discussion
  - Revision of end of standard/security schedule of gLite 3.2 ARGUS

- Argus 1.3 (EMI release) server components (PAP - administration, PDP – decision, and PEP – enforcement Server) fully back compatible with the Argus 1.2 (gLite release) client libraries
  - gLite 3.2 the Argus client library (glite-authz-pep-api-c\_R\_2\_0\_1\_1), used by [gLexec LCMAPS PEP plugin](#), is **fully** compatible with the EMI-1 Argus server
  - installing an EMI-1 Argus 1.3 server to serve gLite 3.2 clients (gLexec) have no impact on the clients functionality
- Argus server components are installed standalone, typically on a separate host

# Proposal for discussion

- End of standard updates → now
- End of security updated → end of Oct 2011

- Currently ARGUS is not declared on GOCDDB
  - Adding it would be useful for downtime management
- Currently ARGUS is not published on BDII
  - Adding it would be useful for operational reasons (assess its deployment, OS flavour, versions etc.)
