Highlights and Contributions to EOSC Portal

Informal review of EOSC-hub and OpenAIRE-Advance

24 January 2019

European Commission, Luxembourg

Alasdair Reid, Jelena Angelis, Elina Griniece, Christine de Neve (EFIS), Jorge Sanchez, Nikos Vogiatzis, Nektaria Berikou, Theodore Ntezes, Panos Spyrou (JNP), Natalia Manola, George Papastefanatos, Akrivi Katifori, Stefania Martziou, Antonis Lempesis (UoA), Jan Wiebelitz, Gabriele von Voigt (LUH), Yannick Legre, Sergio Andreatti, Malgorzata Krakowian (EGI), Rob Baxter (EPCC), Annabel Grant, Michelle Williams, Shaun Cairns, Karl Meyer (GEANT), Donatella Castelli, Paolo Manghi, Franco Zoppi (CNR), Florian Berberich, Pedro Alberto, Manuel Fiolhais (PRACE)

Project

-  Coordination and Support Action (CSA) in Horizon 2020 Programme (INFRASUPP-03-2016-b-3 call)
-  Implementation period: January 2017 – June 2019 (30 months)
-  9 partners, including 5 major e-infrastructures
-  Effort: 138.5 PMs, Budget: €1.5m€

2

Mission

Ensure that by 2020 a broader and more varied set of users discovers and accesses the existing and emerging Services and Resources for Research

3

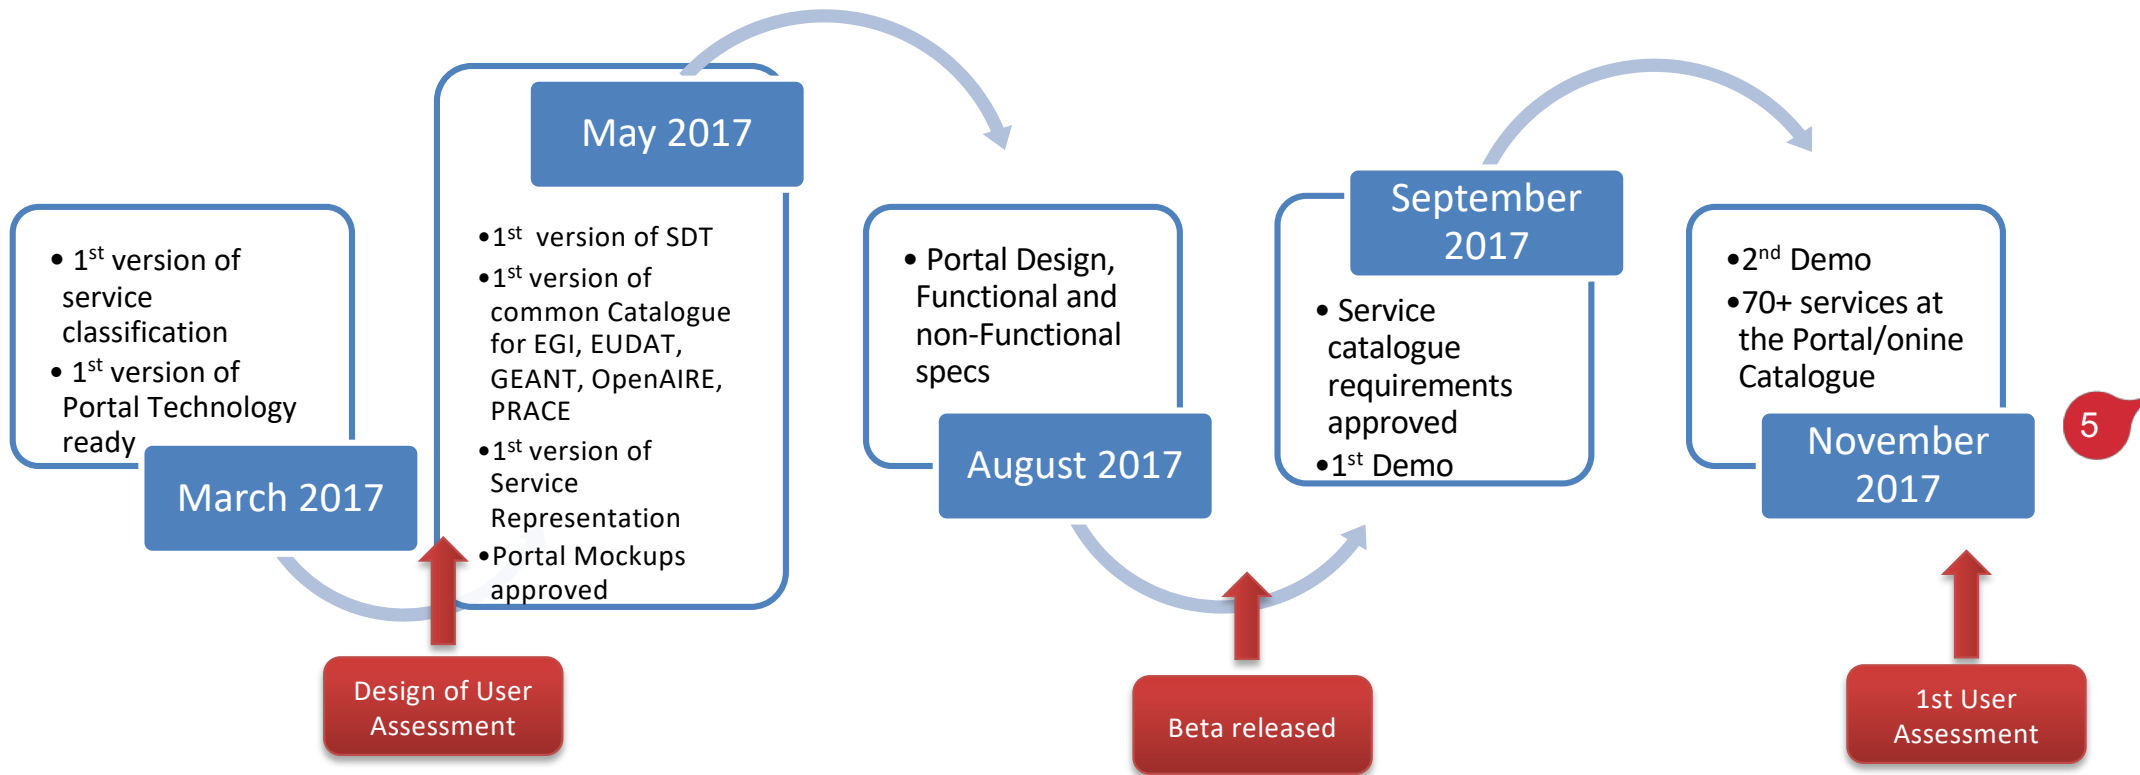

Core Objectives and Key Results

 <p>Structure an open and guided discussion to consensually define a common catalogue for their services and resources</p>	Reached consensus initially with 5 key e-Infras on standard description of services and resources and APIs. Now extended to 15+
 <p>Develop a web platform to act as the gateway for researchers to browse the catalogue of services and solve the “last mile” problem</p>	Developed a production view of the EOSC Catalogue with 250+ services and resources
 <p>Capture and draw policy and sustainability lessons for the development of the European e-Science marketplace</p>	Lessons from building the catalogue and work with SPs fed into the EOSC Portal development, CatRIS and will be further developed and communicated in 1S2019

Highlights 2018

Key activities 2019

EOSC and eInfraCentral Catalogue

eInfraCentral catalogue provides access to 255+ services and resources in 155 entries of 15 SPs from the public and private sector in a fully functional catalogue with a production view (EOSC) and a beta for testing new advanced functionality

Date:	12.06.2017
Version:	v0.2

Abstract: This document constitutes a listing of currently available services; a catalogue of services of the following infrastructures: EGI, EUDAT, GEANT, OPENAIRE, PRACE.

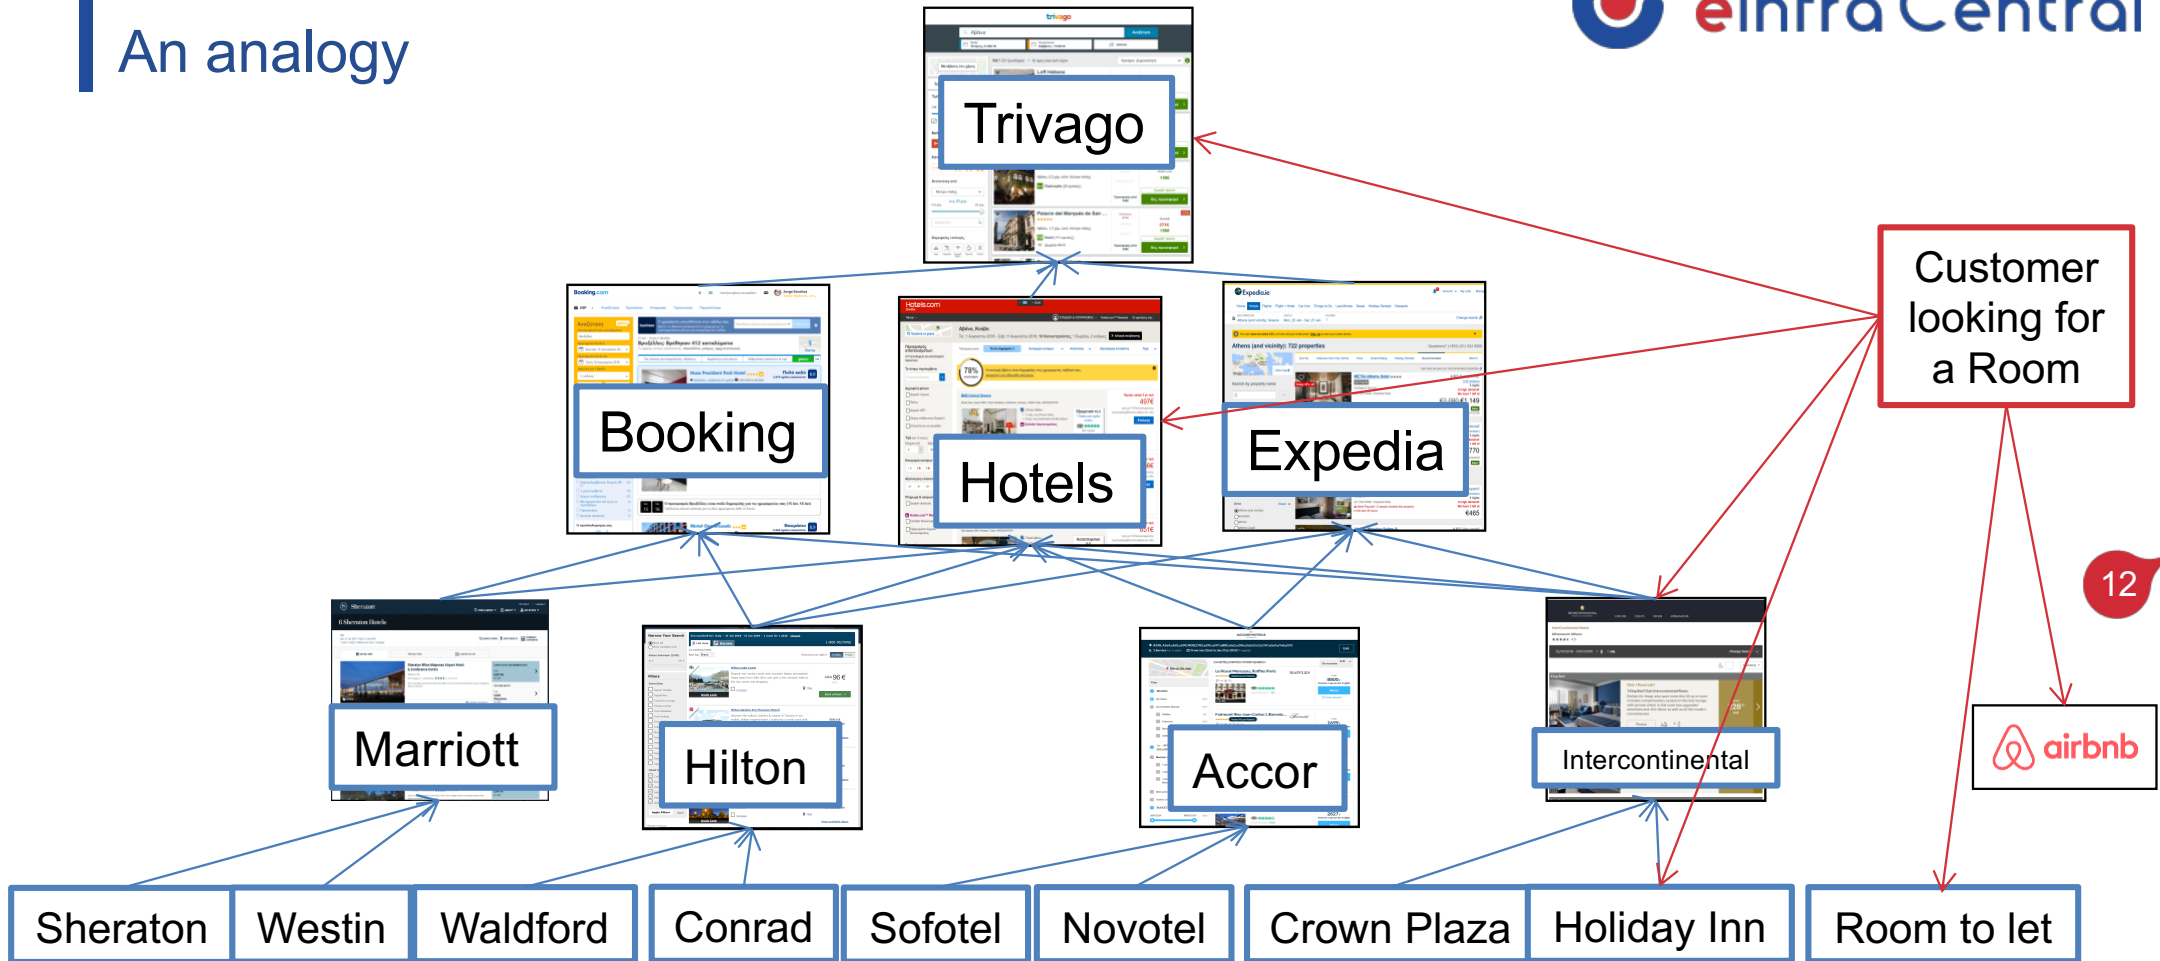

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

Service ID	Service Brand Name	Service Provider	Target Customers/Users	Service Category/Type	Service Phase/TP	Service Webpage
01.01	Cloud Container Compute	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Compute	Production	https://www.egi.eu/services/cloud-container/
01.02	Cloud Compute	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Compute	Production	https://www.egi.eu/services/cloud-compute/
01.03	High-Throughput Compute	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Compute	Production	https://www.egi.eu/services/high-throughput-compute/
01.04	DIRAC Manager	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Platform	Alpha	https://www.egi.eu/services/
01.05	Online Storage	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Storage and Data	Production	https://www.egi.eu/services/online-storage/
01.06	Archive Storage	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Storage and Data	Production	https://www.egi.eu/services/archive-storage/
01.07	Data Transfer	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Storage and Data	Production	https://www.egi.eu/services/data-transfer/
01.08	DataHub	EGI Foundation (via EGI resource providers)	Customers: research organisations, SME/Industry Users: researchers, innovators	Storage and Data	Alpha	https://www.egi.eu/services/
01.09	FITSM Training	EGI Foundation	Customers: research organisations, SME/Industry Users: researchers, innovators	Training	Production	https://www.egi.eu/services/fit-sm-training/
01.10	Training Infrastructure	EGI Foundation	Customers: research organisations, SME/Industry Users: Attendees of cloud training courses, Attendees of scientific conferences, etc.	Training	Production	https://www.egi.eu/services/training-infrastructure/
01.11	Applications Database	EGI Foundation (via EGI resource providers)	Customers: EGI service Providers Users: researchers, innovators	Repository	Production	https://www.egi.eu/services/
01.12	Service Monitoring	EGI Foundation (via EGI resource providers)	Customer: EGI service providers User: EGI users	Operations	Production	https://www.egi.eu/internal-services/service-monitoring/
01.13	Accounting	EGI Foundation (via EGI resource providers)	Customer: User communities and EGI service providers. User: VO Managers, Resource providers management	Operations	Production	https://www.egi.eu/internal-services/accounting/
01.14	Helpdesk	EGI Foundation (via EGI resource providers)	User: Users of the infrastructure, Software developers and support, etc.	Operations	Production	https://www.egi.eu/internal-services/helpdesk/
01.15	Configuration Database	EGI Foundation (via EGI resource providers)	Customer: EGI service providers User: Infrastructure operators, service operators	Operations	Production	https://www.egi.eu/internal-services/configuration-database/
01.16	Validated Software and Repository	EGI Foundation (via EGI resource providers)	Customer: EGI service providers User: Site administrators, software developers, etc.	Repository	Production	https://www.egi.eu/internal-services/validated-software-and-repository/
01.17	Operational tools	EGI Foundation (via EGI resource providers)	User: EGI Operations Manager, Resource Centre Administrators, VO Managers, etc.	Operations	Production	https://www.egi.eu/internal-services/operational-tools/
01.18	Marketplace	EGI Foundation (via EGI resource providers)	Customer: EGI service providers, research and technology Organisations (RTOs) and universities, Research communities, etc.	Operations	Alpha	https://www.egi.eu/internal-services/
01.19	Checkin	EGI Foundation (via EGI resource providers)	Customer: EGI service providers, Research communities User: Both end-users and service managers	Security	Beta	https://www.egi.eu/internal-services/
01.20	Attribute Management	EGI Foundation (via EGI resource providers)	Customer: Research communities, research infrastructures User: VO Managers	Security	Production	https://www.egi.eu/internal-services/
02.01	B2SAFE	EUDAT CDI consortium	Community data manager; service provider	Data storage	Production	https://www.eudat.eu/services/b2safe
02.02	B2SHARE	CSC	Individual researchers; community data manager	Data storage	Production	https://www.eudat.eu/services/b2share
02.03	B2DROP	JSC	Individual researchers; community data manager	Data storage	Production	https://www.eudat.eu/services/b2drop
02.04	B2FIND	DKRZ	Individual researchers; community data manager	Data discovery	Production	https://www.eudat.eu/services/b2find
02.05	B2STAGE	EUDAT CDI consortium	Individual researchers; community data manager	Data movement	Production	https://www.eudat.eu/services/b2stage
02.06	B2HANDLE	EUDAT CDI consortium	Service provider; community data manager	Data registration	Production	https://www.eudat.eu/services/b2handle
02.07	B2ACCESS	JSC	Service provider; community data manager	Authentication and Authorization Infrastructure	Production	https://www.eudat.eu/services/b2access

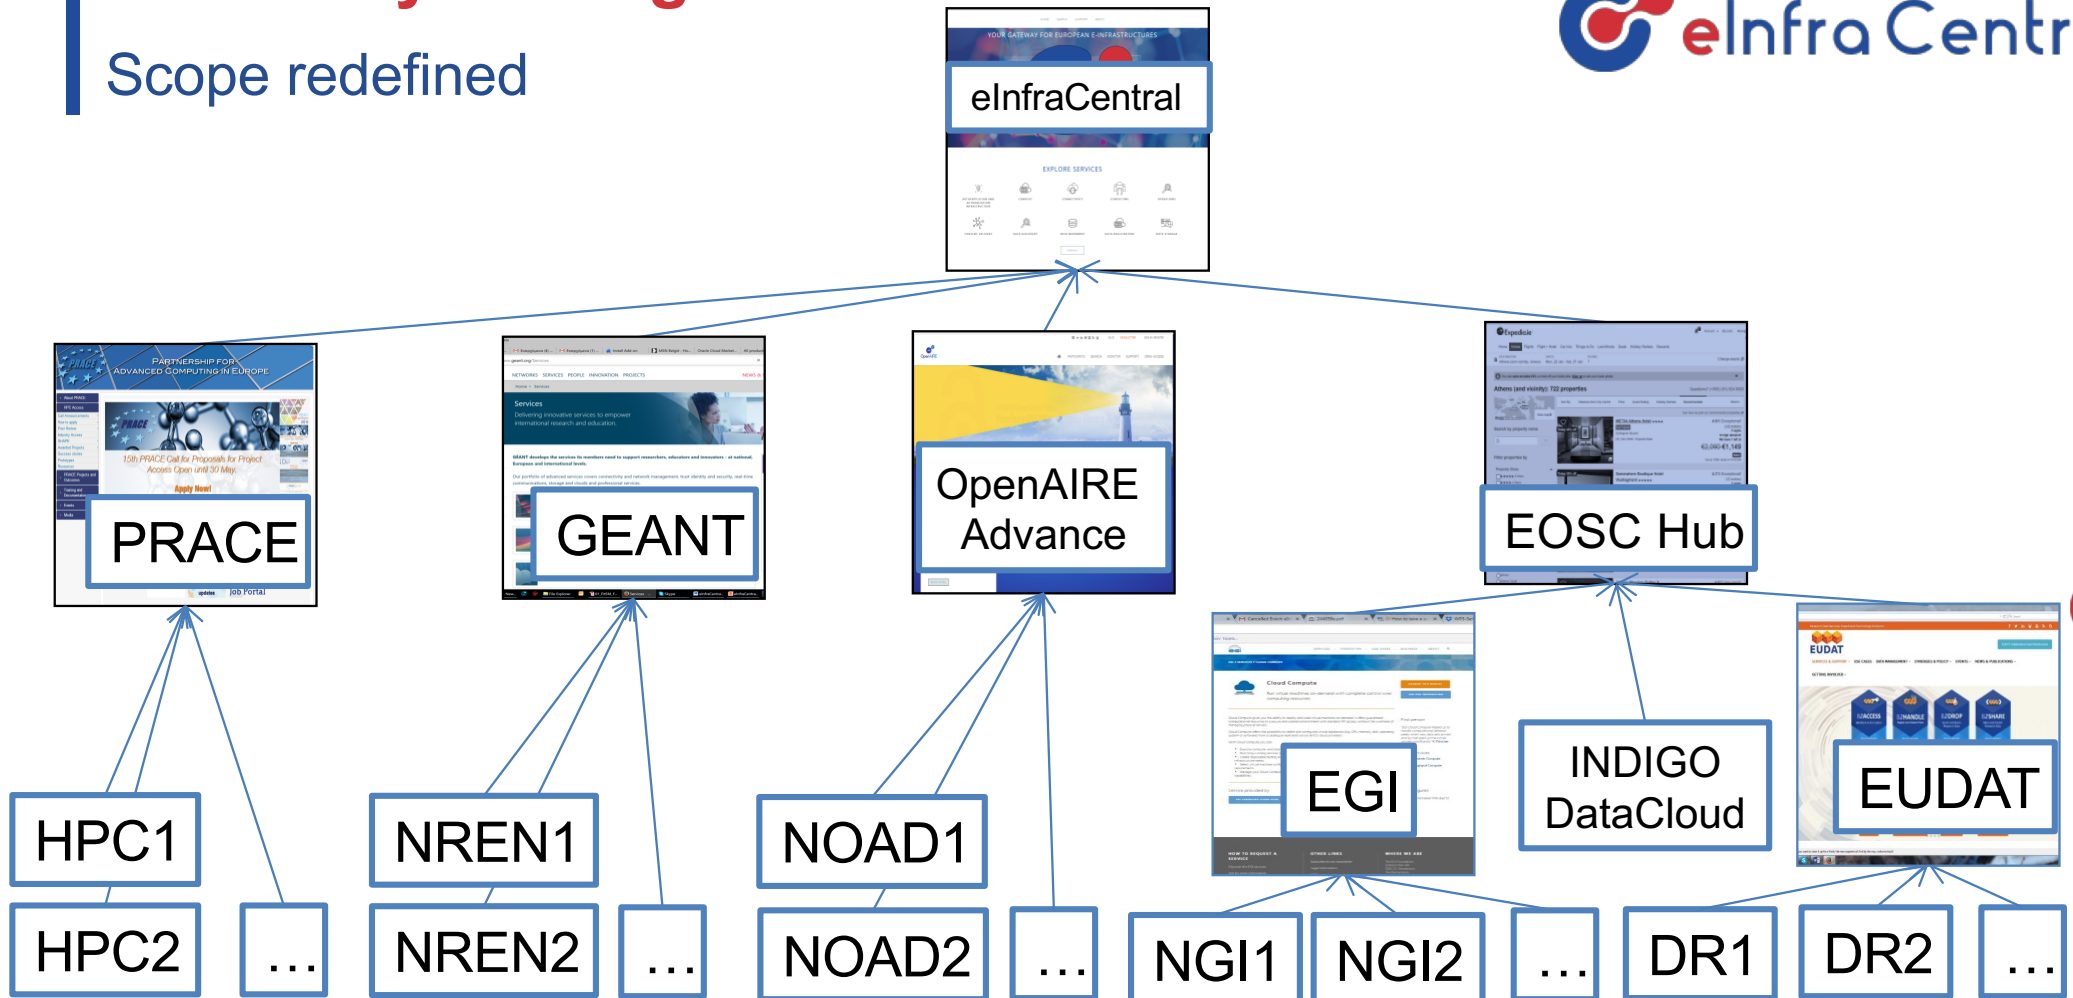

2. Convey the Big Picture

An analogy

2. Convey the Big Picture

Scope redefined

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

2. Convey the Big Picture

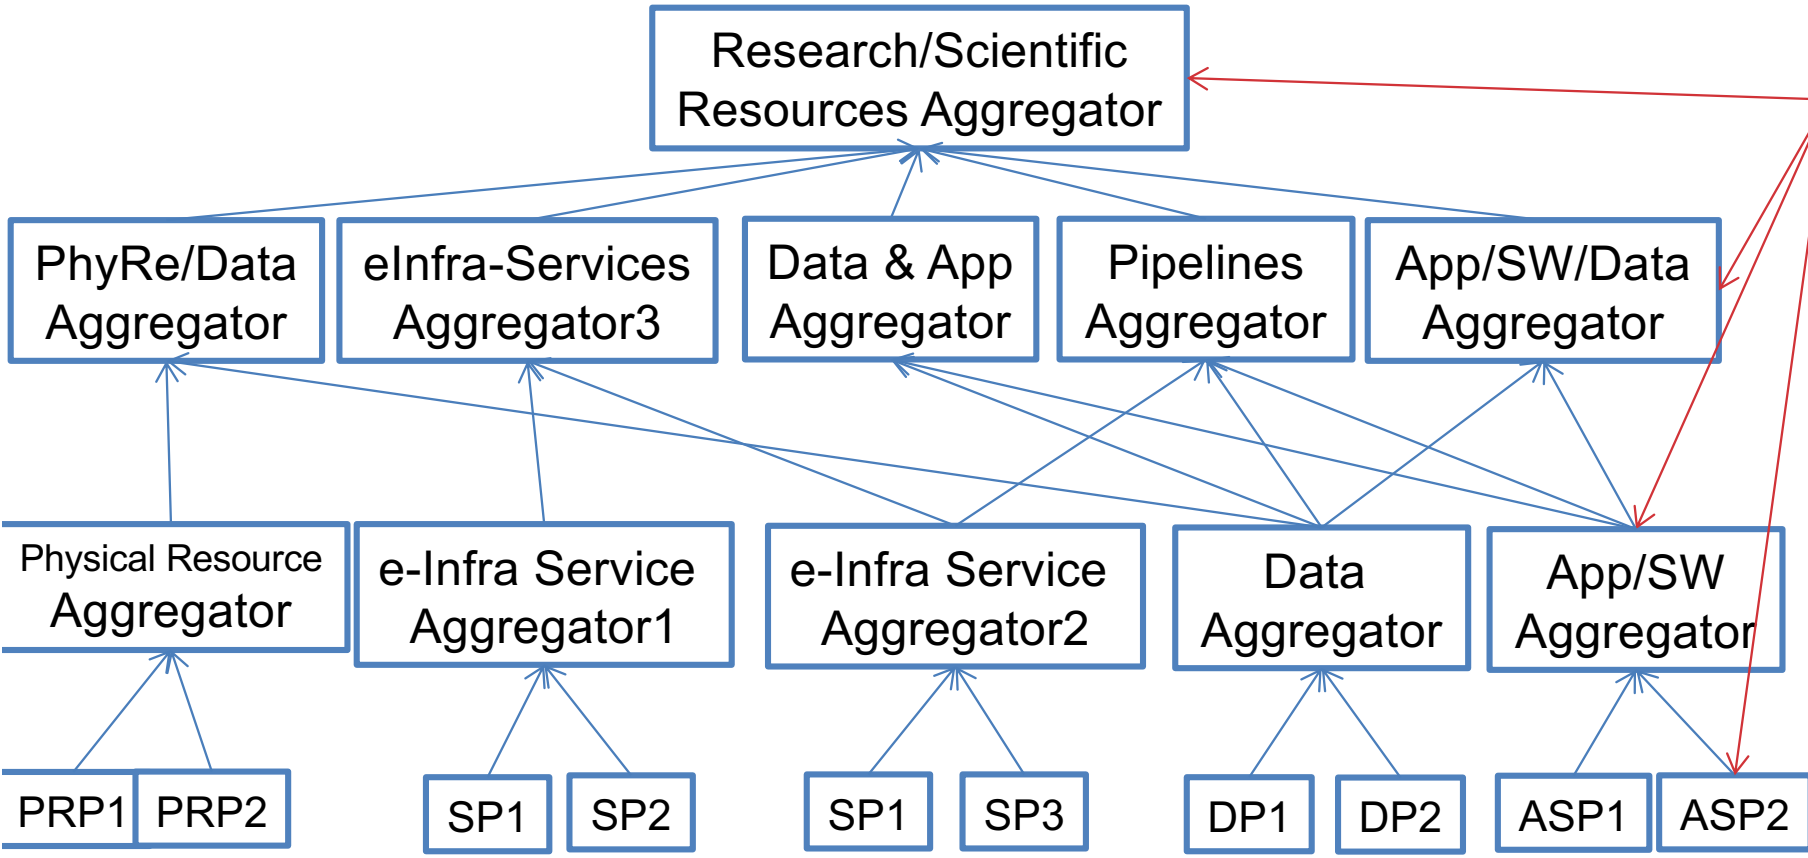

Dynamics of a market and needs of a user

Researcher looking for a Research/Scientific Resource

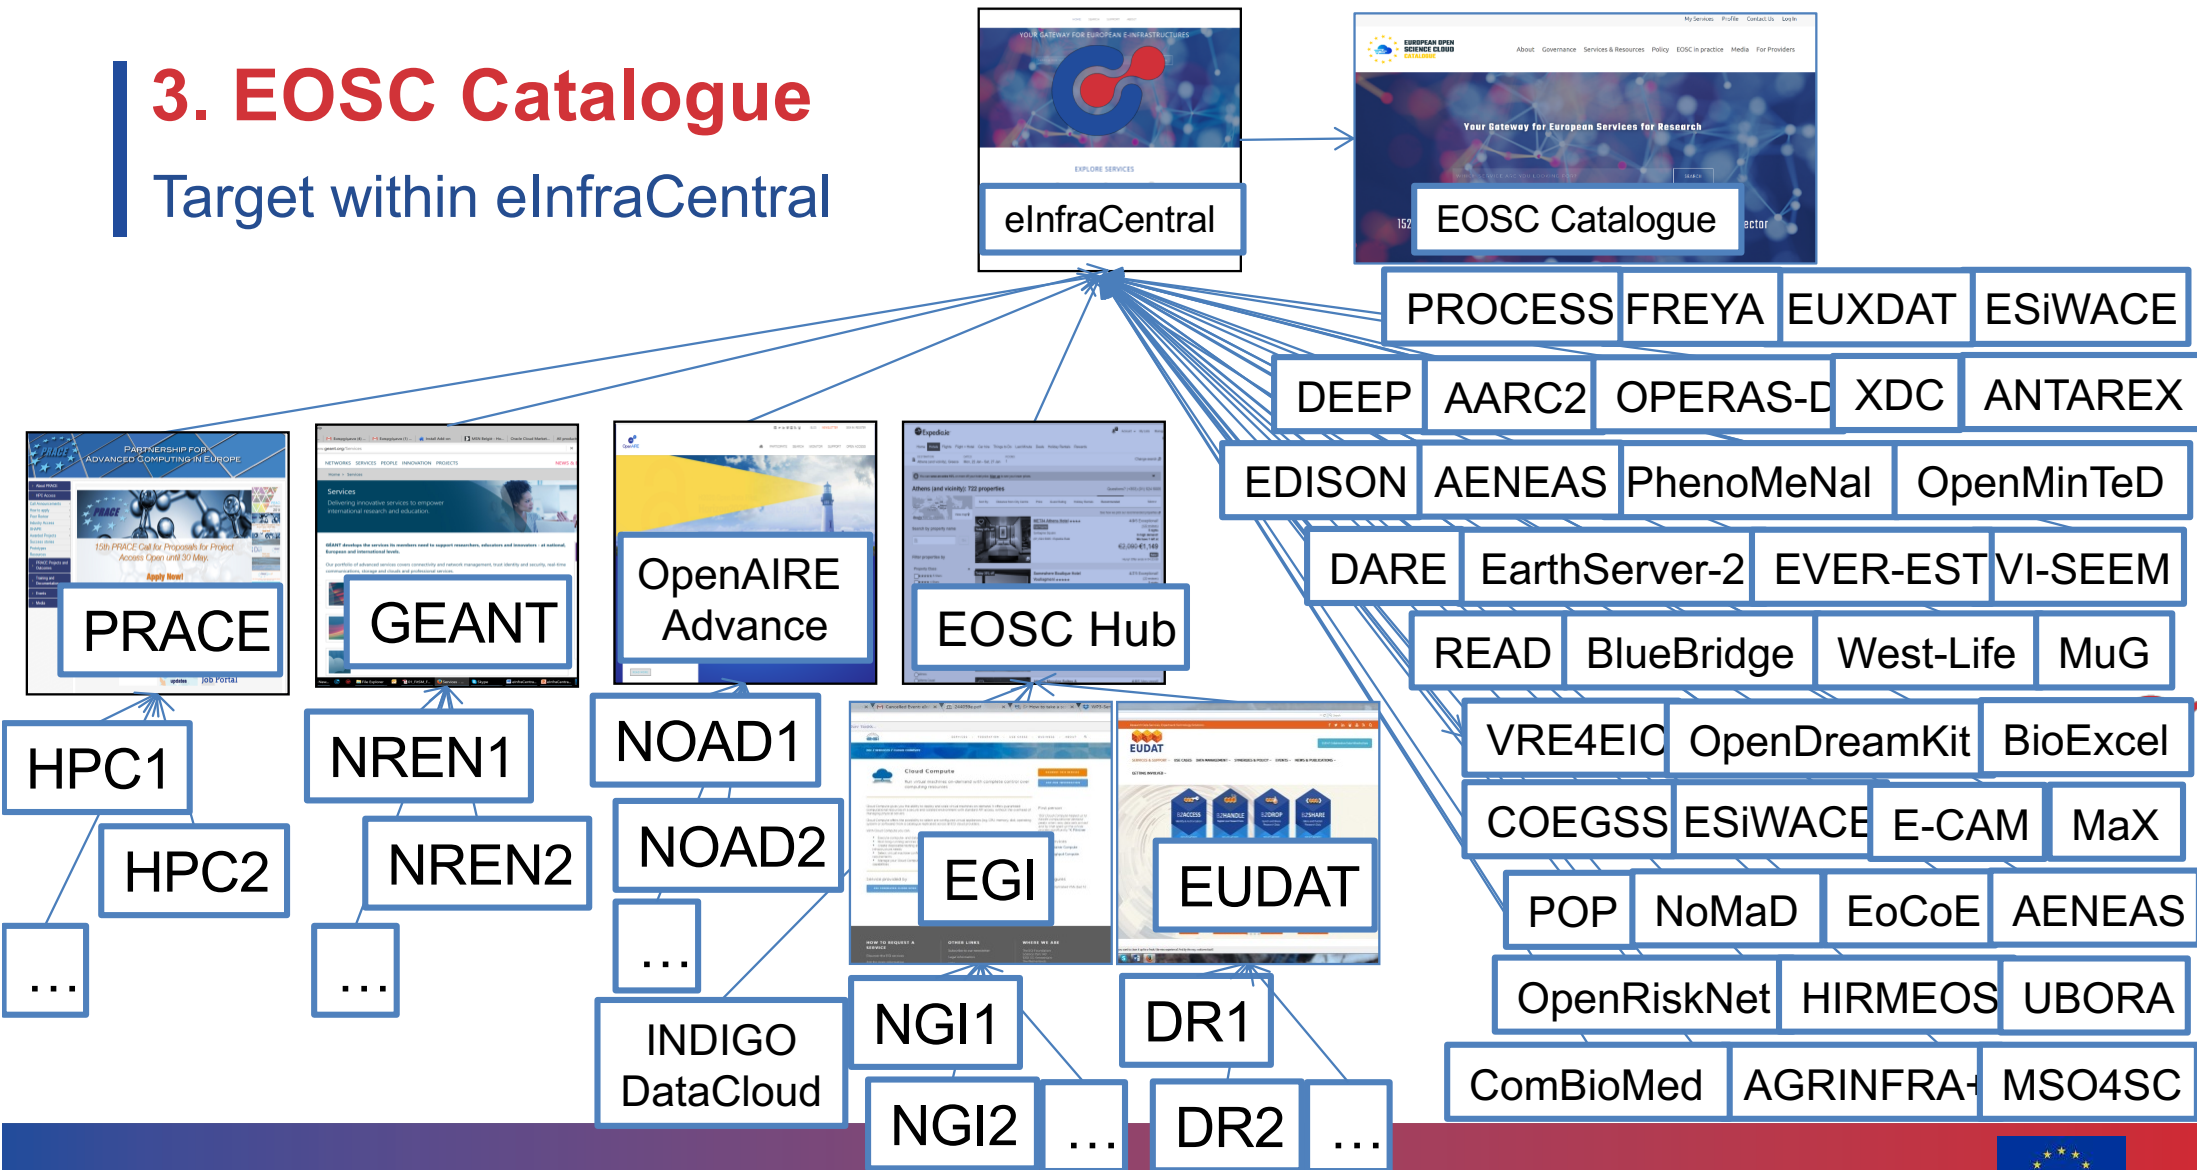

To make this happen we need:

1. Standardised descriptions of research resources
2. Standardised APIs for the exchange of service/ resources-related information

3. EOSC Catalogue

Target within eInfraCentral

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

3. EOSC Catalogue

Target ecosystem with CatRIS and EIC+

4. Service/Resource Description Template v1.12

Basic Service Information

Service ID	Mandatory	Global unique and persistent identifier of the service.	The first part denotes a unique identifier for the Service Provider and the second part the unique identifier of the service within the Service Provider.	01.03
Service URL	Mandatory	The Uniform Resource Locator (web address) to the entry web page of the service usually hosted and maintained by the service provider.	Create a unique URL for each service and provide the shortest possible alias	http://www.service-provider.eu/service-name or http://service-name.service-provider.eu
Service Provider Name	Mandatory	The organisation that manages and delivers the service and with whom the customer signs the SLA.	-	e.g. GEANT, PRACE, EGI, EUDAT, OpenAIRE, etc.
Service Name	Mandatory	Brief and descriptive name of service as assigned by the service provider.	Should be descriptive from a customer point of view and should be quite simple, such that someone non-technical is able to understand what the service is about. This attribute will be used in the search function to prioritise results.	B2DROP
Service Tagline	Optional	Short text, catch line or slogan which serves mainly marketing and advertising purposes.	Marketing specialists are encouraged to be engaged in order to come up with a catch phrase that can aid service dissemination and visibility.	Store, share and access your files and their metadata on a global scale
Service Description	Mandatory	High-level description in fairly non-technical terms of what the service does, functionality it provides and resources it enables access to.	Description in one paragraph without bullets or rich HTML. This field is used in the search function to prioritise results.	B2SHARE is a user-friendly, reliable and trustworthy service that allows to store and share worldwide small-scale research data, results and metadata from diverse contexts and guarantees their long-term persistence.
Service Options	Optional	A high-level description of the various options or forms in which the service can be instantiated.	Non-exhaustive description in one paragraph without bullets or rich HTML.	"Standard or enhanced", "Bronze, silver and gold", "10, 20, 30", "Elementary Level, Advanced Level, Expert Level"
Target Users	Optional	Type of users/customers allowed to commission/benefit from the service.	This field is important in order to determine the primary benefited users of the Service. Target users should be defined as accurately and as inclusive as possible at the same time.	Research Organisations, Industry, SMEs, Researchers, Scientists, Funders, Policy Makers, Service Providers, Data Providers, etc.
User Value	Optional	Description of the benefit delivered to a customer/user by the service.	Benefits are usually related to alleviating pains (e.g., eliminate undesired outcomes, obstacles or risks) or producing gains (e.g. increased performance, social gains, positive emotions or cost saving).	For the communities who need to guard against data loss, B2SAFE is a customer facing service that allow data replication and safe storage between geographically distributed centres in the EUDAT CDI.
User Base	Optional	List of customers, communities, users, etc using the service.	Description should be as quantified as possible.	900+ data providers in Europe with different compatibility levels. Adoption in Latin America (LaReferencia), Mexico and Japan.
Service Symbol	Mandatory	The Uniform Resource Locator (web address) to the logo/visual identity of the service.	Provide the shortest possible URL to the service logo. It is better that each service has its own logo with the same look and feel.	http://service-name.service-provider.eu/Symbol.jpg
Service Multimedia	Optional	The Uniform Resource Locator (web address) to the multimedia material of the service (screenshots or videos).	Provide the shortest possible URL to a video or other multimedia material.	http://service-name.service-provider.eu/Multimedia

4. Service/Resource Description Template v1.12

Service Classification Information				
Service Version	Mandatory	Informs about the service version that is in force.	Only stable releases should be referenced.	3.1
Service Last Update	Mandatory	The date of the latest update of the service.	The date should refer to when the updated version became available to users, not when it was developed or released internally in the SP.	43159
Service Change Log	Optional	A log of the service features added in the last and previous versions.	Clear, staccato sentences for each feature should be used.	Upgrade of user interface. Correction of minor bugs.
Service Valid for	Optional	The date up to which the service description is valid.	You may put here the date a related project is planned to conclude and this might lead to a change in the service delivery model. The expiring date should imply validity period until 23:59:59. In case it is earlier, the previous day should be used in the date.	03/12/2018
Service Life Cycle Status	Mandatory	Used to tag the service to the full service cycle.	For the eInfraCentral catalogue, allowed values are: Alpha, Beta and Production.	Production
Service TRL	Mandatory	Used to tag the service to the Technology Readiness Level, a method of estimating technology maturity of critical technology elements. TRL are based on a scale from 1 to 9 with 9 being the most mature technology.	See https://en.wikipedia.org/wiki/Technology_readiness_level#European_Commission_definition For the eInfraCentral catalogue, allowed values are: TRL7, TRL8, TRL9.	For the eInfraCentral catalogue, allowed values are: 7 - system prototype demonstration in operational environment, 8 - system complete and qualified, 9 - actual system proven in operational environment.
Service Category	Mandatory	A named group of services that offer access to the same type of resource that is of interest to a customer/user.	Select only one category.	Networking
Service Subcategory	Mandatory	Type/Subcategory of service within a category	Select only one be subcategory.	Direct Connect
Service Place	Mandatory	Regions/Countries Availability	-	World
Service Language	Mandatory	Languages of the User interface	-	English
Service Tags	Optional	Attribute to facilitate searching based on keywords.	This field will be used in the search function to prioritise results. This field is very important to make your service discoverable.	AIA, Security
Required Services	Optional	Other services that are required with this service.	List of Service IDs. If needed, give the name of a service. When registered in the catalogue this will be replaced by the ID.	01.21
Related Services	Optional	Other services that are commonly used with this service.	List of Service IDs. In preparation note the name of a service. When your services are registered in the catalogue this should be replaced by the SID.	03.04

4. Service/Resource Description Template v1.12

Service Support Information

Service Order	Mandatory	The Uniform Resource Locator (web address) to the webpage to request the service from the service provider.	Visible to Customers	http://service-name.service-provider.eu/Order
Service Helpdesk	Optional	The Uniform Resource Locator (web address) to a webpage with the contact person or helpdesk to ask more information from the service provider about this service.		http://service-name.service-provider.eu/Helpdesk http://helpdesk.service-provider.eu
Service User Manual	Optional	The Uniform Resource Locator (web address) to the service user manual and documentation.		http://service-name.service-provider.eu/UserManual
Service Training Information	Optional	The Uniform Resource Locator (web address) to training information on the service.		http://service-name.service-provider.eu/Training
Service Feedback	Optional	The Uniform Resource Locator (web address) to the page where customers can provide feedback on the service.		http://service-name.service-provider.eu/Feedback

Service Contractual Information

Service Price	Optional	The Uniform Resource Locator (web address) to the information about the payment models that apply, the cost and any related information.		http://service-name.service-provider.eu/Price
Service Level Agreement	Mandatory	The Uniform Resource Locator (web address) to the information about the levels of performance that a service provider is expected to achieve.	Take a look at EGI SLA https://www.dropbox.com/s/86z098cd1ipzwir/EGI%20Corporate%20SLA%20FINAL.PDF?dl=0 and EUDAT SLA https://www.dropbox.com/s/86z098cd1ipzwir/EGI%20Corporate%20SLA%20FINAL.PDF?dl=0 to formulate. It can be very simple to start with. One page.	http://service-name.service-provider.eu/SLA
Service Terms Of Use	Optional	The Uniform Resource Locator (web address) to the webpage describing the rules, service conditions and usage policy which one must agree to abide by in order to use the service.		http://service-name.service-provider.eu/TermsOfUse
Service Funding	Optional	Sources of funding for the development and/or operation of the service.	Publicity guidelines of each respective funding sources should be adhered to. Good if you could give here reference to EC or other public funding.	EC (Horizon) and National (NREN) Development: EC (H2020), National (NREN). Operations: National (capacity and federation), EC (federation).

4. Service/Resource Description Template v1.12

Service Performance Information				
Service Requests	Optional	The total number of demands for a specific service, e.g. service access requests, service information requests, requests for other material service attributes, etc.		15
Service Users	Optional	The total number of people who utilise a specific service.		200
Service Usage	Optional	The level or percentage of actual penetration/utilisation of a specific service.	As many decimal points as needed should be used.	35,00%
Service Capacity	Optional	The maximum volume of available service provision while maintaining standards of quality and performance. e.g. 30.000 concurrent users, 3.000 service orders per day, etc.		3000 service orders per day
Service Coverage	Optional	The range of geographical areas and/or thematic sectors that a service is addressed to, e.g. EU Member States (regional), high energy physics (scientific community) etc.		EU Member States (regional)
Service Cost	Optional	The monetary value that a user is requested to pay in order to utilise a specific service, e.g. free of charge, 100 €, etc.		Free of charge
Service Availability	Optional	Availability, i.e., the fraction of a time period that an item is in a condition to perform its intended function upon demand ("available" indicates that an item is in this condition); availability is often expressed as a probability.	As many decimal points as needed should be used.	99,99%
Service Reliability	Optional	Reliability, i.e., the probability that an item will function without failure under stated conditions for a specified amount of time. "Stated conditions" indicates prerequisite conditions external to the item being considered. For example, a stated condition for a supercomputer might be that power and cooling must be available - thus a failure of the power or cooling systems would not be considered a failure of the supercomputer.	As many decimal points as needed should be used.	98.1%
Service Serviceability/Durability	Optional	Serviceability, i.e., the probability that an item will be retained in, or restored to, a condition to perform its intended function within a specified period of time Durability, i.e., the ability of a physical product to remain functional, without requiring excessive maintenance or repair, when faced with the challenges of normal operation over its design lifetime.	As many decimal points as needed should be used.	99.99%, High, Very High, ...
Service Performance Indicator Name	Optional	Other Service Level Target or Performance Indicator	N/A	Total number of service orders
Service Performance Indicator Value	Optional	Indicator Value Measurement of Other Indicator	N/A	1

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

7. Labelling on Catalogue Maturity

Long-term catalogue quality

- Methodology introduced by JNP to improve the “service readiness” of SPs.
- A SP is awarded with a label based on 41 quality indicators assessed by 3 independent reviewers.
- A comparison to other SPs is provided and recommendations to improve the service catalogue and related processes.
- Data and report are treated with confidentiality; not available to any other third party, unless the service provider has agreed beforehand in written manner

8. Service Provider Registration Process

Rules of Participation

- A transparent, inclusive and open process for the registration of SPs and their Services/Resources in the eInfraCentral Gateway that can be followed by all interested parties irrespectively of their maturity.
- With a long-term aim to find paths of the process that can be automated so as to allow scalability and avoid bottlenecks in the registration process.
- The Process includes currently 6 steps
- One more will be added to support the registration to the EOSC marketplace

8. Service Provider Registration Process

9. Schema Representation and API

Way to exchange information and interoperate

- Guidelines for the REST API and the service-related representation and specifications for the exchange of information among service providers and third party applications.
- The APIs methods offer the functionality to programmatically access, search and retrieve the contents of the catalogue, such as services, service providers, service performance indicators and service analytics.

Horizon 2020 Programme
Digital Excellence & Science infrastructure
eInfrastructure Science Cloud

Grant Agreement Number: 731049
Project Acronym: eInfraCentral
Project Full Title: European E-Infrastructure Services Gateway
Type of Action: Coordination and Support Action (CSA)
Call: H2020-INFRA-SUPP-2016-2017

Deliverable D3.3
Guidelines for schema representation and APIs

Type (Distribution Level):	Public
Deliverable Leader:	UOA
Authors:	George Papastefanatos, Akrivi Katifori, Natalia Manola, Stefania Martziou, Antonis Lempesis, Panagiotis Labropoulos (UOA)
Due Date:	30.04.2018
Actual Submission Date:	21.05.2018
Version:	1.0

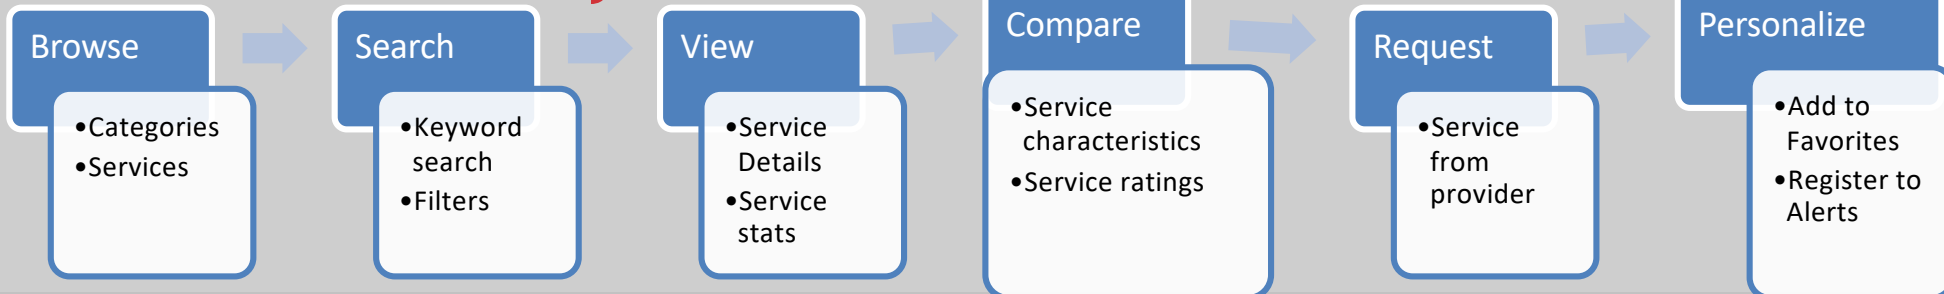

Abstract: This document specifies the guidelines for the service-related representation of eInfraCentral information, and the REST API specifications for the exchange of information from service providers to the eInfraCentral Gateway and its provisioning to third party applications. The APIs methods offer the functionality to programmatically access, search and retrieve the contents of the eInfraCentral catalogue, such as services, service providers, service performance indicators and service analytics.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 731049

Direct and compact

The image displays two screenshots of the eInfra Central website. The left screenshot shows a 'Direct' view of a service page. It features a navigation menu on the left with categories like Training, Security, Compute, Operations, Connectivity, Data Movement, and more. The main content area shows a list of services, each with a title, a star rating, a description, and a view count. The right screenshot shows a 'Compact' view of the same service page. It has a more streamlined layout with a large header image, a 'Service coverage' section, and a 'Usage' section. The right sidebar contains links for 'CONTRACTUAL INFO', 'SUPPORT', and 'PERFORMANCE INFORMATION'.

12. SP Dashboards

The screenshot displays the eInfra Central dashboard. On the left is a navigation menu with services like EGI Cloud Compute, EGI Service Monitoring, EGI Online Storage, EGI Data Transfer, EGI Marketplace, EGI FILSM Training, EGI Applications on Demand, EGI Check-In, EGI Configuration Database, and EGI Operational tools. The main content area features a central vertical timeline titled 'UPDATE HISTORY' with four entries: 'VERSION 3' (updated 08/08/17 by Antonis Latsopoulos), 'UPDATED' (05/06/17 by Antonis Latsopoulos), 'VERSION 2' (updated 03/01/2017 by George Papadimitrakis), and 'UPDATED' (02/06/17 by Panagiotis Latsopoulos). To the left of the timeline are two line charts showing usage metrics over time. At the top right of the dashboard is a 'SIGN OUT stefania@pisc' button. The footer includes social media links, a newsletter sign-up, and a funding notice from the European Union's Horizon 2020 programme.

Recommendations

Policy

- Continue focus on developing the components that allow for interoperability:
 - a single Service/Resource Description Standard
 - the one and only related API
- Facilitate the community with a shared vocabulary about Service Management, SM management standards and frameworks
- Support SPs to become professional in service provisioning, user-oriented, user-centric, business-focus and adopting FAIR principles
- Devise a framework to maintain the quality level of the catalogue and thus its sustainability (including the rules of engagement, registration process, quality report, user ratings, etc)
- Drive consensus on the service-level performance indicators and monitoring framework. Research/scientific resource providers are reluctant to share performance related information to any third party mainly because of “fear” of misuse.
- Take special actions to communicate to all scientific communities, industry, government and citizens, in all member states, about the EOSC Portal to collect additional requirements and related feedback

Recommendations

Characteristics of the Catalogue

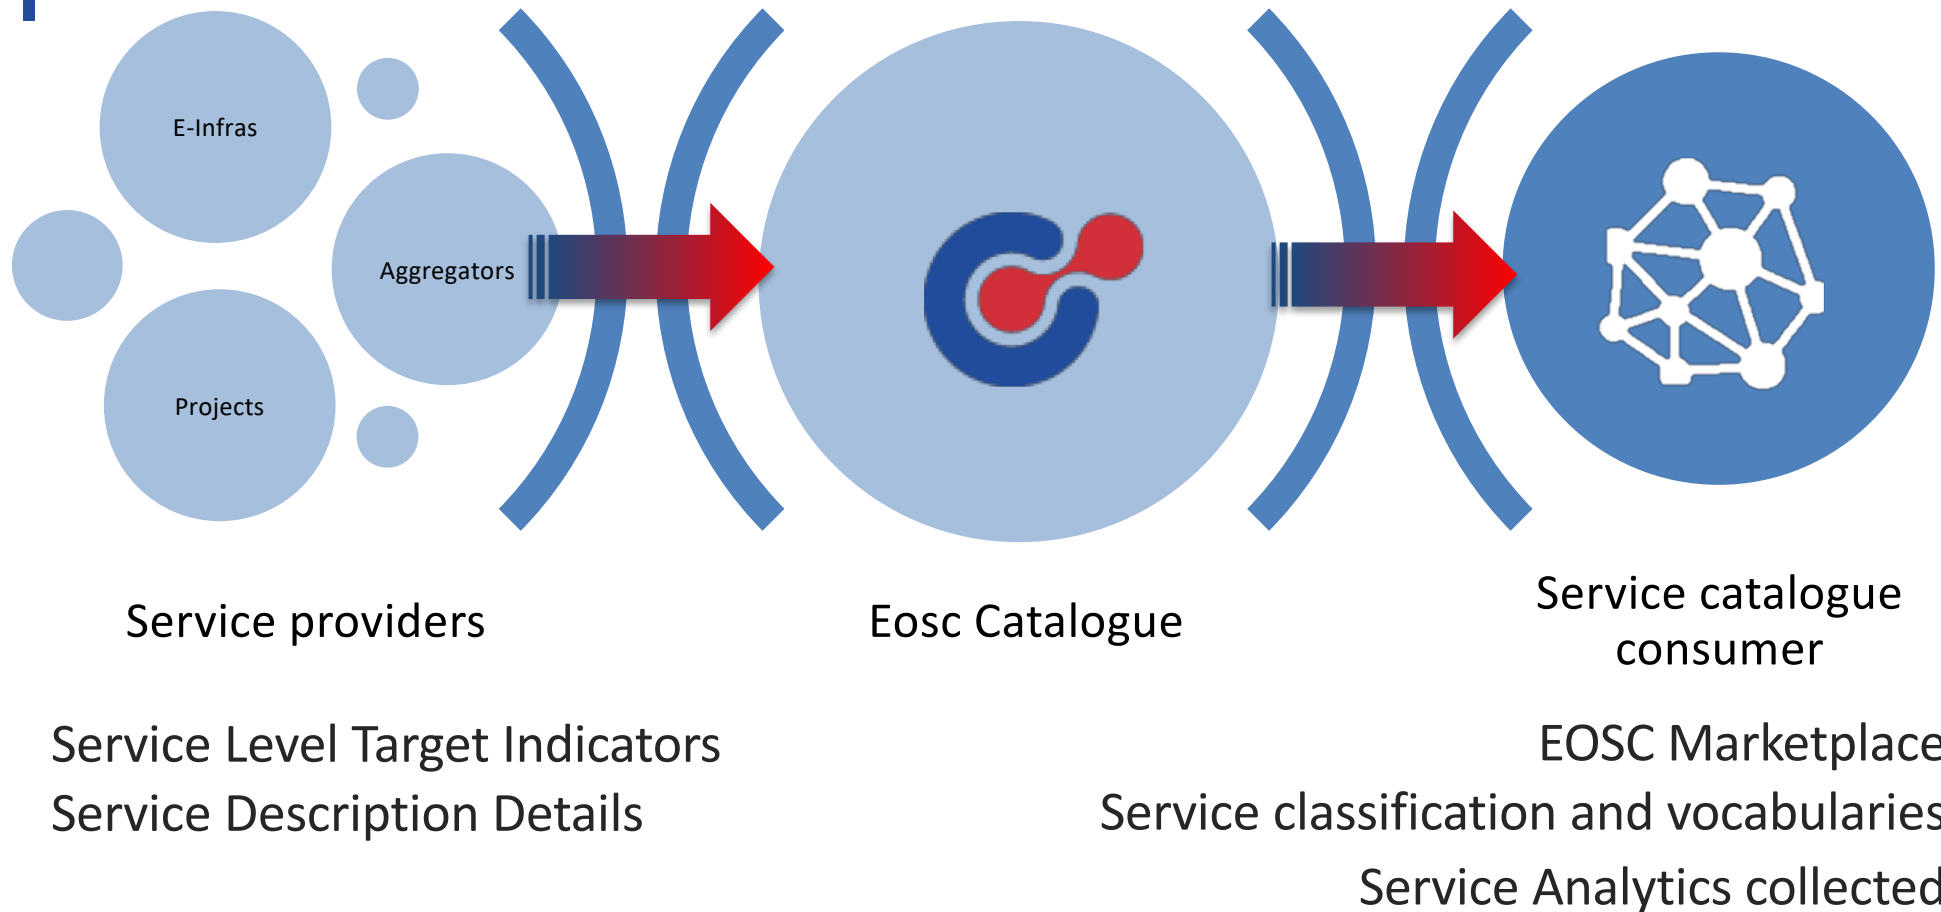

Recommendations

Technical

- Advanced catalogue functionality to improve the user experience
- Improve user centric approach with added value services to users
- New options for service listings and comparisons
- New algorithms for service recommendations to users
- Additional user personalization capacities
- Allow for users to build their portfolios
- Establish multi-faceted service ordering processes
- Technically push on interoperability among catalogues and marketplaces
