

# SECURITY TRAINING AND DISSEMINATION

EGI-CSIRT F2F meeting.  
KIT, 6-7 april 2011

Dorine Fouossong, NGI FR.

# Security training and dissemination

## Missions

- Plan and organize training events
- Setup and maintain EGI-CSIRT public and private wikis
- Collect and archive training materials
- Consolidate rss feed
- Develop training materials
- Support NGI in setting up local training events.

# Plan and organize training event

One event per yer collocated with the EGI technical forum. Organized in collaboration with EMI security people.

Status for preparation of the next event at EGITF2011:

- A topic list have been reviewed on the list.
- We got feedback for the middleware security session: feasible, *need to allocate more time to answer questions from audience.*
- *We are seeking a trainer for a security operation talk. Any volunteer?*

## EMI security training session EGITF2011 actual topic list

- Glexec: deployment issue, recommendations for secure configuration.
- Advanced security tutorial for cream ce: configuration, user banning.
- Communication between argus and glexec: architecture
- Setting up argus server
- EMI security architecture

*[ Speaker: EMI people. John White and Christoph Witzig are happy to help finding trainers. ]*

## Operational security session EGITF2011 actual topic list

- How csirt handle critical vulnerability and effects on sites  
[ Speaker: Mingchao ]
- What to do if you find a vulnerability in the middleware?  
How are they handled? [ Speaker: Linda ]
- Incident workflow and forensic tools. [ Speaker: Leif ]
- Tips and bests practices for keeping your site secure [ Speaker: ? ]
- Advanced pakiti tutorial: what configuration if you want to monitor all hosts of the site? Dealing with scalability issues.  
[ Speaker: ? Christos? Daniel? ]
- Using the security challenge framework. [ Speaker: ? Carlos? Sven ? Dorine ? ]

# Setup and maintain EGI wikis

Many improvements done on the private wiki.

No request for change for the public wiki.

- Collect and archive training materials
  - Status: to be done in the next 6 months.
  
- Consolidate rss feeds:
  - Status: to be done in the next 6 months.

- Develop training materials
  - Requests come from other EGI CSIRT task forces. E.g. security drills.
  - Any suggestion or comment ?
- Support NGI in setting up local training events
  - Should we keep this in our missions ?
  - What support are we talking about here ?

# Discussions 1/3

Actual public for EGI-CSIRT security training activities:

- End users: no
- Site administrators: yes
- Site security contact: yes
- Ngi security contact: no
- COD/ROD: no

Should we keep this as it or evolve?

## Discussions 2/3

- What is your opinion about security awareness of grid ( cloud) resource providers ?
- What should be improved ?

# Discussions 3/3

What is your opinion about security awareness of grid ( cloud) resource providers ?

What should be improved ?

- How could we ensure that EGI stakeholders are aware of security matters?
- How could we measure that ?
