Analysis Tools and Support

Thursday, 22 September 2011 15:10 (20 minutes)

This talk will summarize the recent key results in analysis support for the high energy physics HUC. We will first review the user analysis activity in 2011 for the ATLAS and CMS experiments. Next, the development achievements and plans for the Ganga and CRAB grid analysis tools and the HammerCloud analysis testing service will be discussed. We will conclude with some key operational experiences in relation to these tools.
