Joint security training for system admins and alike

The EGI CSIRT and the middleware security experts will join force again to provide security training for system administrators and site managers. The training will focus on two main areas: operational security and middleware security.

The attendees are expected to walk away with some security best practices in areas such as incident response, vulnerability handling, security monitoring with Pakiti etc. The middleware security will cover topics such as GlueX, Argus etc.

14.00-14.45 How to install and configure glueX

14.45-15.30 How to create Argus policies

Required Facilities

Projector + Internet

Duration (90min sessions)

4 consecutive sessions
