## The Cluster of Research Infrastructures for Synergies in Physics (CRISP) project

*Monday, 19 September 2011 16:00 (13 minutes)*

The Cluster of Research Infrastructures for Synergies in Physics (CRISP) project aims to build collaborations between the eleven Research Infrastructures (RIs) participating in the project. It focuses on four R&D tasks that are of utmost importance for these RIs: Accelerators, Instruments & Experiments, Detectors & Data Acquisition, and Information Technology (IT) & Data Management. This presentation gives a short introduction to the CRISP project and focuses on the aims and objectives with respect to Data Management.

**Presenter:** FIELD, Laurence (CERN)

**Session Classification:** Data Management Workshop
