Key Results from the Services for Heavy User Communities (SA3) Workpackage

These sessions highlight the key results from the SA3 workpackage which focusses on the needs of the so-called Heavy User Communities (HUCs). The HUCs include High Energy Physics (HEP), Life Sciences (LS), Astronomy and Astrophysics (A&A), Earth Sciences (ES), each of which is supported by a dedicated task, together with Shared Tools and Services which support these and other communities (including a number outside the HUC domain).

Key issues for SA3 are sustainability and the (related) drive towards common solutions.

Required Facilities

lap-top + beamer

estimate room for 60 people

Duration (90min sessions)

.
