

Grid Operations Interoperability Overview

Tuesday, 14 September 2010 16:00 (10 minutes)

This session includes a description of the global task O-E-11, Coordination of interoperations between NGIs and with other Grids (EGLeu), situated under TSA1.3. It will define the goals that are to be achieved in operational interoperability and try to give a rough overview of the status quo. Furthermore the forthcoming and the current version and future development of Milestone MS407 “Definition of the operational interfaces that must be supported for resources to be integrated into the production infrastructure.” will be shortly discussed.

Presenter: LECHNER, Michaela (EGLEU)

Session Classification: Grid Operations Interoperations
