

NGI_DE experience and future plans for the operation of heterogeneous middleware stacks

Tuesday, 14 September 2010 14:50 (20 minutes)

- 1- NGI plans of integration of new resources and/or multiple middleware stacks,
 - related timescales
 - amount of resources and sites involved in this integration process
- 2- Which Virtual Research Communities are going to benefit from this integration?
 - is the integration “pushed” by the user community, or is it NGI-driven for organizational reasons?
 - which VRC use cases will take benefit from this integrated set of middleware stacks?
- 3- What are the advantages from an NGI perspective of running an integrated infrastructure?
 1. What are the operational technical challenges to be faced in order of priority?

Presenters: POSCHLAD, Angela (KIT); JRAD, Foued (KIT)

Session Classification: EGI Production Infrastructure
