

Handling Software Vulnerabilities in the EGI infrastructure

Wednesday, 15 September 2010 11:00 (45 minutes)

This talk will describe the handling of software vulnerabilities in the EGI infrastructure. This will include how to report a vulnerability, the basic issue handling process, and what should be done by various parties involved to ensure the timely resolution of vulnerabilities according to their severity. Some of the other activities the EGI SVG plans to carry out will also be described.
