

Operational Integration of UNICORE services

Tuesday, 14 September 2010 17:10 (20 minutes)

Up to now UNICORE services haven't been deployed in the EGI infrastructure but in D-Grid, DEISA and other infrastructures. The operational model of D-Grid, where Globus, gLite, dCache, and UNICORE are operated, will be used to highlight the challenges of operational integration. Requirements from resource providers and virtual organizations as well as resource usage models will be described to understand the background of the operational model.

Presenter: BREU, Rebecca

Session Classification: Grid Operations Interoperations
