Discussion: Standards Engagement of the DCI Projects

Wednesday, 15 September 2010 14:50 (40 minutes)

1. What Working Groups in various SDOs do you regularly engage with and which respond to the technical requirements of your architecture?

2. What are the most important products of the OGF process and how are these likely to be used in the future?

3. What other standards bodies play a vital role in the distributed computing area? Give some explicit use cases.

4. Grid computing has been demonstrated to be an effective and efficient tool for scientific research (as shown by, e.g. by articles in the iSGTW newsletter). What characterizes the domains of science and the type of computation or data processing where grid computing has been successful?

Presenter: MUSCELLA, Silvana (SIENA)

Session Classification: The DCI Projects
