

COD - EGI's operator on duty

Thursday, 16 September 2010 16:30 (15 minutes)

In the transition from EGEE to EGI there were substantial changes in the grid oversight activity. The monitoring of sites moved from a central model to a regional model and the EGEE Regional Operations Centres transformed into one or more NGIs.

In this talk we will discuss these changes and their impact. In addition, we will discuss how the COD activity has changed going from EGEE to EGI Inspire.

Presenter: TROMPERT, Ron (SARA)

Session Classification: EGI Helpdesk - Support, Process and Implementation
