Introduction to EMI

Thursday, 16 September 2010 11:00 (10 minutes)

The European Middleware Initiative (EMI) project represents a close collaboration of the major European middleware providers - ARC, gLite, UNICORE and dCache - to establish a sustainable model to support, harmonise and evolve the grid middleware for deployment in EGI, PRACE and other distributed e-Infrastructures.
This talk will provide an overview of the project and how it fits concretely in the DCI ecosystem.

Primary author: MEGLIO, Alberto (EMI)

Presenter: MEGLIO, Alberto (EMI)

Session Classification: European Middleware Initiative
