

EMI Collaboration Programs

Thursday, 16 September 2010 11:10 (20 minutes)

This talk will focus on the specific collaboration mechanisms made available by EMI to ensure that “everyone is heard” by the project’s middleware providers.

EMI’s collaboration program is articulated along several lines of dialogue, from the Common DCI Roadmap activities, to specific collaborations with VRCs, ESFRIs and other user community representatives, to a series of activities with technology partners (including commercial parties), to the Works-with-EMI program for the numerous software tools that interact with the EMI middleware.
