## Welcome

- Welcome and thanks
- I'd encourage an open session
- Make Comments/Ask Questions  
(but be nice – don't forget we need to interoperate)
- Thanks to Michaela Lechner

# Interoperation

- Why Interoperation
  - Many Researchers/Communities starting to span the boundaries between HPC and HTC.
  - Also Data Centric e-infrastructures on the horizon
- The Interoperations DREAM (possibly)
  - Seamless e-Infrastructure
  - Complexity hidden from users
- How to achieve Interoperation
  - Standards.
  - Tools/Frameworks/Technologies
  - Policies

## One Size Fits All ?

I think we all know it's  
a little more difficult  
than that!
