

EGI experience in supporting international scientific collaborations

Wednesday, 4 November 2020 12:00 (10 minutes)

In the past 15 years the EGI Federation has been supporting multiple research communities and scientific collaborations thanks to collaboration agreements with peer e-Infrastructure operators in the world which allow the EGI federation to be part of a integrated system of international research infrastructures by endorsing common policies, interoperability best practices and by coordinating service delivery activities. This presentation will present approaches and lessons learnt from the current experience.

Presenter: FERRARI, Tiziana (EGLeu)

Session Classification: Global Open Science Cloud – Part 3: Global e-Infrastructures: Challenges and Opportunities in Achieving the GOSC Vision
