

EGI Strategy towards AI: How AI contributes to the Digital Transformation in Research.

Wednesday, 4 November 2020 10:25 (20 minutes)

Development of data science (DS), machine learning (ML) and artificial intelligence (AI) is currently hot topic in the science and data is game changer. It is also a challenge to research infrastructures including e-infrastructures. As a modern federated e-infrastructure EGI Foundation will give its answer at the strategic level and also with services and projects based on the strategy.

Presenter: TENHUNEN, Ville

Session Classification: AI strategy in Europe
