

Unlock the potential of EO data and services with NextGEOSS

Wednesday, 4 November 2020 09:45 (15 minutes)

The NextGEOSS has developed a datahub and a suite of user centric services to accelerate the development of EO services. This project is funded by the EU and is a contribution to GEO to support UN SDGs and is continuing its support through Next-EOS community activity. This session will introduce the NextGEOSS services and explain how you can maximize the benefits for your research or business activities.

Presenter: PANDA, Koushik (DEIMOS)

Session Classification: Earth Observation data, cloud services and analytics tools for climate and environment protection
