

EGI Conference 2020

EGI Clinics: CVMFS

Tuesday 3 November 15:30 CET

Questions and Answers

- (Baptiste, EGI): CVMFS for data

used in production by OSG but with parallel distribution (like XrootD servers)
CVMFS not intended to have lots of clients doing random data access on lots of files

- Jim: how does cores per server relate to the number of servers per squid instance?

Important to check monitoring information to analyse what's happening:
https://twiki.cern.ch/twiki/bin/view/Frontier/InstallSquid#Enabling_monitoring
Application/context (CMS, Atlas,...) impacts behaviour due to specificities

- (Name, affiliation): (Comment or question)
