HPC integration in EGI-ACE

Thursday, 21 October 2021 11:15 (10 minutes)

EGI-ACE aims at providing interoperability guidelines for HPC systems with the EOSC Cloud Compute platform. Four scientific pilot use cases with combined cloud and HPC needs will be used for exploring and identifying how HPC systems should be exposed to the EOSC portal and how users should interact with them.

This session will provide a status update with presentations from the scientific pilots, HPC centres and technology providers involved in the activity
