EOSC DIH: Bridging Industry with the EOSC

Tuesday, 19 October 2021 15:15 (15 minutes)

The EOSC DIH is an international and multi-partner cooperation that supports private companies in easily accessing the digital technologies, services and human capital offered by the EOSC. It combines four pillars to help companies become more competitive:

Piloting and co-design: where products or services are designed and/or tested.

Technical access: High-throughput, High-performance and cloud computing; machine learning; research data; data management services, as well as several tools and applications available for re-use.

Training and support: technical consultancy, business coaching and funding search.

Visibility: inclusion of company solutions in the EOSC Marketplace, print and online material and exploitation of the EOSC networking and ecosystem opportunities such as joining online communities, event attendance and potential future projects.

There are already several EOSC DIH pilots developing innovative solutions and bringing them to market in different domains such as sport and biomedicine, cybersecurity, manufacturing, transport, agriculture or environment. More information about current pilot and success stories can be found [here](#).
