Sharing Data while Keeping Data Ownership

Wednesday, 20 October 2021 16:25 (15 minutes)

The session is an introduction to the EUHubs4data project (https://euhubs4data.eu/), and presents one of the challenges data owners face when publishing their datasets, by being unable to safeguard, share or monetize their data. The session covers the solutions adopted in the project to address this challenge, and how an architecture based on the IDSA ecosystem empowers Digital Innovation Hubs (DIHs) to achieve a FAIR usage of their datasets. A short demo about how data from EGI DataHub can be published through an IDSA connector rounds up the session.
