Distributed Deep Learning by Horovod - a new EOSC service

Thursday, 22 September 2022 16:55 (20 minutes)

The "Distributed Deep Learning by Horovod" EOSC service provides the infrastructure, resources and libraries to its users in order to perform effective distributed training of deep neural networks. Access to a ready-to-use Horovod cluster is provided through Jupyterlab. The talk will give a short introduction of the service developed and recently onboarded by the Neanias EU project and supported by the Hungarian ELKH cloud.
