Moving to a more eco-friendly data center in France: possibilities and constraints

Wednesday, 21 September 2022 16:15 (15 minutes)

The management of data center in French public research institutes is subject to a regulatory framework that defines and sets out several policies, such as equipment purchasing procedures, the supply of fluids, etc. This presentation will briefly detail this framework and how a policy to improve the environmental footprint of a data center can be conducted in France.

Presenter: PANSANEL, Jerome (CNRS)

Session Classification: Green Computing
