

KER 3: Research data spaces and processing tools for EOSC

Period 1 Review meeting, 24/05/2022

Giuseppe La Rocca

EGI-ACE WP5 Leader

Community Support Team Lead. at EGI Foundation

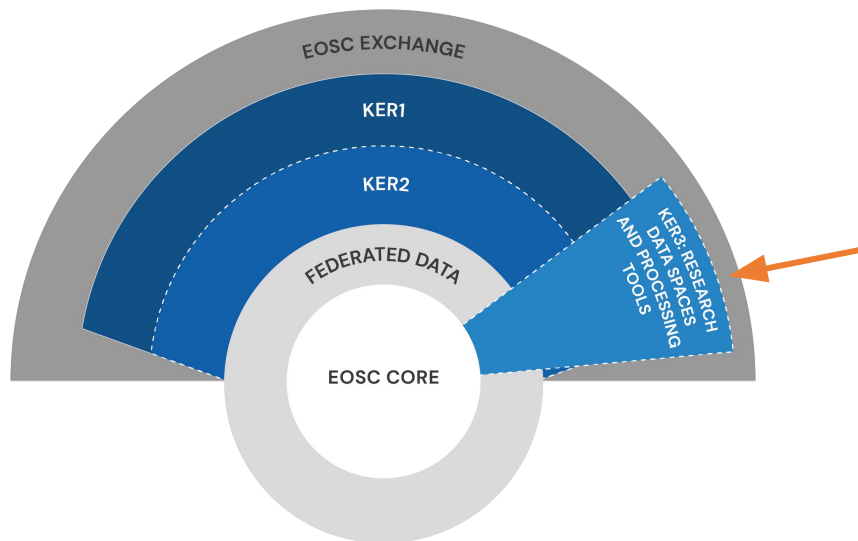

Dissemination level: Public

Disclosing Party: Project Consortium

Recipient Party: European Commission

EGI-ACE receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 101017567.

KER3: RESEARCH DATA SPACES AND PROCESSING TOOLS FOR EOSC

Health and Medicine

Social Sciences and Humanities

Climate Research

Energy and Physical Sciences

Environmental Sciences

New Thematic Services

- **Provided by:** WP5, T2.3

KER3 OVERVIEW

ABOUT THE KER

- Thematic services (Data Spaces and Processing Platforms) from EGI-ACE to the EOSC Exchange
- Leveraging the EOSC Compute Platform (KER1) to deliver scalable environments for data analytics

USER GROUPS

- Researchers
- Scientific communities
- Research Infrastructures

KEY VALUE PROPOSITIONS

- Reduce development time for digital science, and contribute to the cross-fertilisation of knowledge across disciplines
- Facilitating cross-domain sharing and exploitation of research datasets

DISSEMINATION & COMMUNICATION

- **28** training events
- **2** webinars

EXPLOITATION

- **22** Thematic Services from Health Common, Green Deal, Fundamental research and Social Science and Humanities domains
- **49,000** users served
- **20,109,077** CPU/h consumed

IPR APPROACH

- Open-source licenses SW
- Documentation is licensed under **CC-BY**

Motivations

User Group: Researchers and scientific communities, and RIs

BEFORE

- Fragmentation to access datasets, tools and resources to support domain-specific research
- No inter-disciplinary research
- Lack of computing resources to support European researchers

AFTER

- Data Spaces facilitate research and development activities
- Reduce development time for digital science, and contribute to the cross-fertilisation of knowledge across disciplines.
- Facilitating cross-domain sharing and exploitation of research datasets

Where the Thematic Services come from?

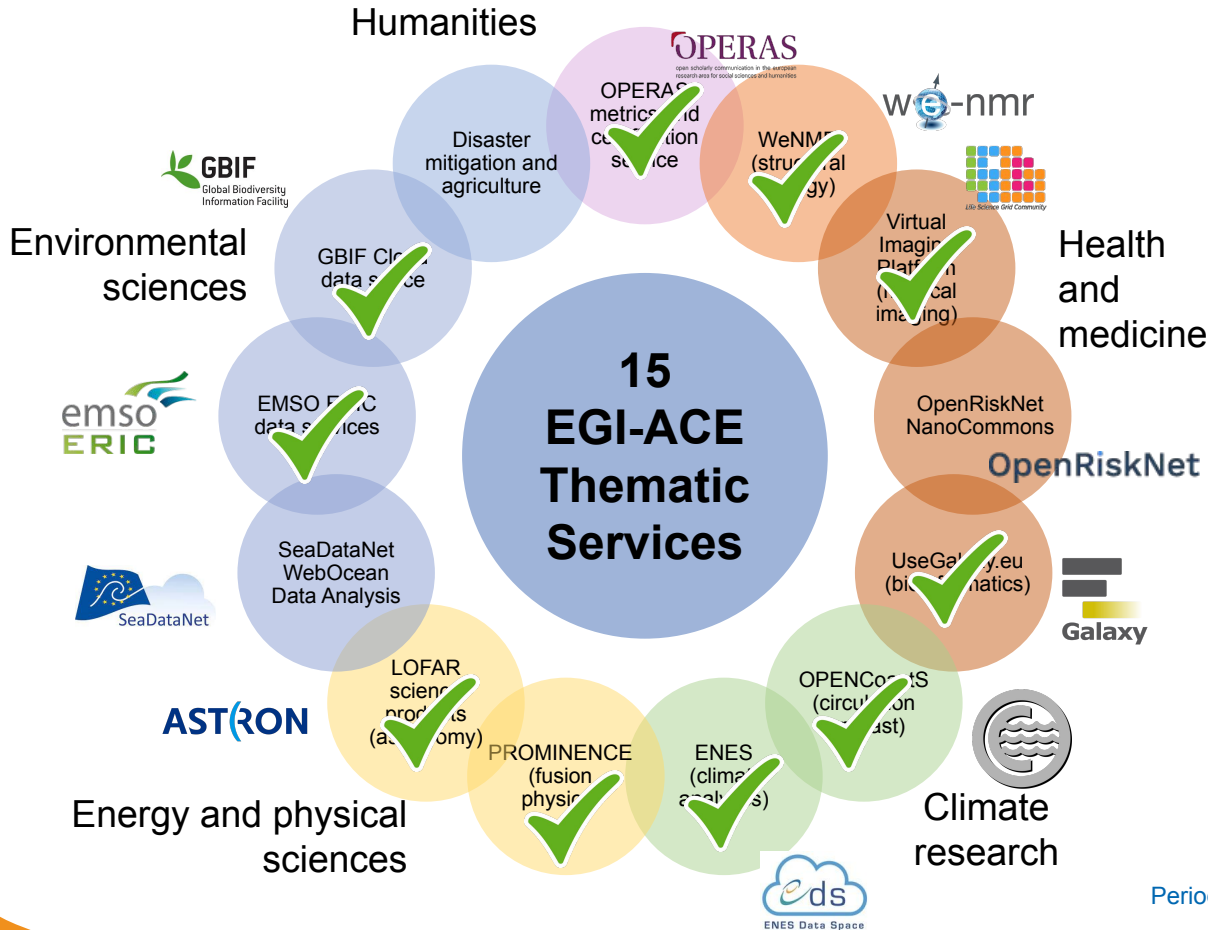

From the project → This talk

- **WP5:** 8 Data Spaces + 7 Processing Tools
- **T2.3:** 7 Early Adopters

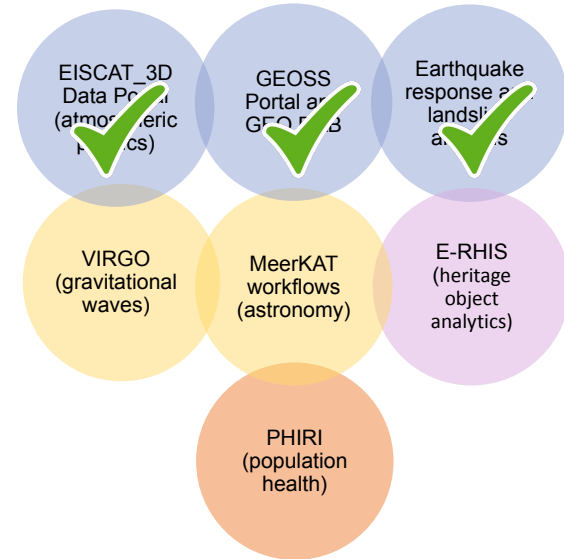

External → See next talk

- New communities engaged by EGI-ACE (T2.3) via the EGI-ACE Open Call

Thematic Services from EGI-ACE

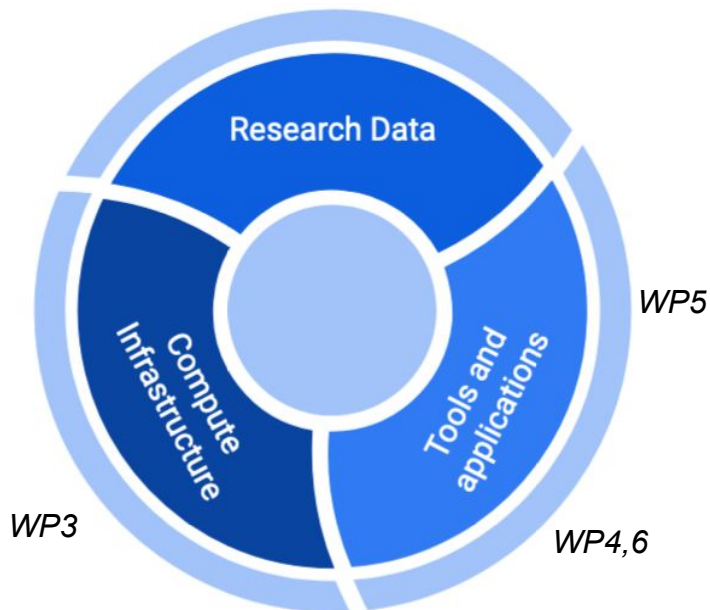

7 Early Adopters

Already on-boarded in the EOSC Portal

Methodology of supporting Thematic Services

WP5

WP3

WP4,6

Supported by federated resources, access and platform services with **SLAs**

Methodology of supporting Thematic Services

- **Integrate with Infrastructure Services (WP3)**
 - The OPENCoastS Processing Tool
- **Integrate with Platform Services (WP4)**
 - The EISCAT_3D Early Adopter
- **Integrate with Federated Services (WP6)**
 - ENES Data Space

DEMO

OPENCoastS - Coastal Dynamics on-demand forecast

OPENCoastS(+) service assembles on-demand forecast systems for selected coastal areas and generates daily forecasts of the region of interest for 48h

- Full orange - **Integrated** in EGI-ACE
- Dashed orange - Integrated before EGI-ACE
- Full blue - **Planned** for the next part of the project

Ambition in EGI-ACE:

- Leverage on the EOSC Compute Platform to create a one-stop-shop and robust service for coastal hydrodynamics and faecal contamination modelling and forecasting
- Applicable to any coastline in the world
- Available via a Web portal: Configuration Wizard, Forecast Manager, and Outputs viewer

Impact:

- Total resource consumed : **1,690,033** Cloud CPU/h
- #. of users: **+54%**
- # of country reached: **58**
- # of use cases: **168**
- # of international deployment: **200**
- # of training events: **4**
- Amount of data processed: **4TB**

The EISCAT data federation case

Incoherent scatter radar data fusion and computation

EISCAT-3D radar, next generation incoherent scatter radar system, EISCAT association.

Sanya Incoherent Scatter radar (SYISR), next generation incoherent scatter radar, IGGCAS.

Use Case Scenarios

- EISCAT & SYISR (Meta)data federation
- Federated processing
- On-demand data movement

Key deliverables

- Cross-continental data migration and federated computing
- High-speed and high-capacity experimental data processing
- Data sharing policies and mechanisms

Credits: Häggström and X. Yue (2020)

The EISCAT data federation case

Ambition in EGI-ACE:

- Leverage on the EOSC Compute Platform to:
 - Federate open data collected from different scatter radars in different geographic regions in Europe and China
 - Set-up a federate processing infrastructure where open data can be processed across the different data centres

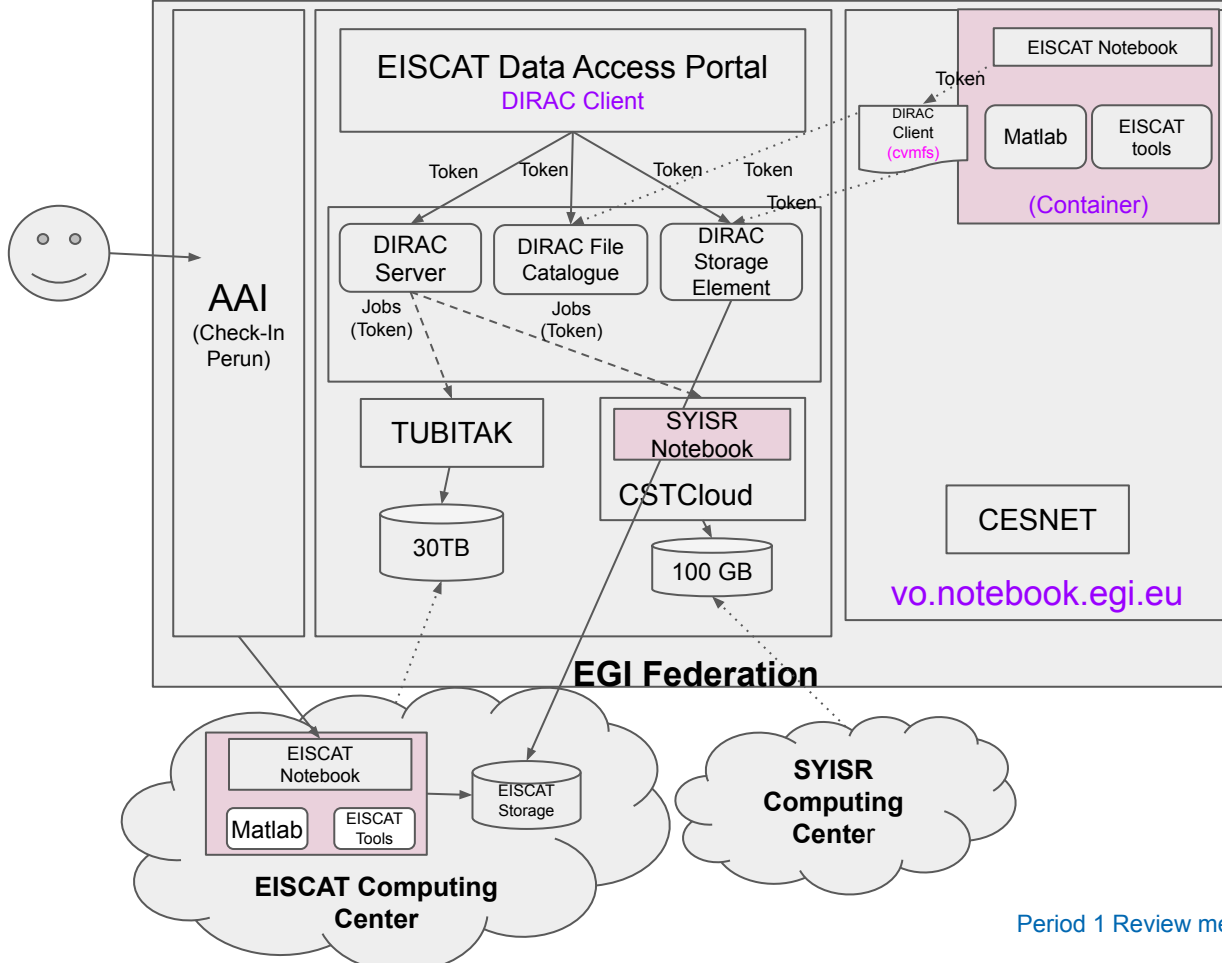

Impact:

- Total resource consumed : **30,781** Cloud CPU/h
 - Starting from Dec. 2021 using CNIC resources
- EGI-ACE Services integrated:
 - EGI Check-in, EGI Cloud Compute,
 - EGI Workload Manager, EGI Notebooks
- Open Data: **30 TB**
- EISCAT user access workshops (use Check-in + Perun)
- # training events: **7**

Integration with the Platform Services (WP4)

ENES Data Space CMIP6 subset

- Repository: <https://esgf-node.ipsl.upmc.fr/search/cmip6-ipsl/>
- Datasets: **20-25PB**
- Resources: 172 vCPU cores, 172GB of RAM and 300TB of block storage

GBIF Biodiversity Data Portal

- Repository: <https://datos.gbif.es/?lang=en>,
- Datasets: **386** datasets (from the GBIF Spanish node), **178.132** species, **10TB**
- Datasets: **286** datasets (from the GBIF Portugal node), **3TB** of datasets

EMSO-ERIC Data Spaces

- Repository: <https://erddap.emso.eu>,
- Datasets: **10TB** of hydrophone data available
- Resources: 492 vCPU cores, 1.7TB of RAM and 10.6TB of block storage

SeaDataNet (require authentication)

- Repository: https://files.seadatanet.org/aggregated_datasets/
- Repository: <https://data-argo.ifremer.fr/>
- Datasets: **38 GB** of data available
- Resources: 585 vCPU cores, 1.3TB of RAM and 60.8TB of block storage

LOFAR

- Repository: <http://spaceweather.astron.nl/SolarKSP/data/dynspec/>
- Datasets: **9TB** of data available
- Resources: 4.9M HTC hours and 150TB of block storage

- **28 training events** were organized by the WP5 partners, with focus on domain researchers (M15):
 - **9** by WeNMR,
 - **7** by EISCAT_3D,
 - **4** by OpenCoastS,
 - **3** by LOFAR,
 - **3** by Virtual Imaging Platform,
 - **1** by ENES, and
 - **1** by EMSO-ERIC.
- **2 webinars** were organized (M15):
 - Virtual Imaging Platform
 - The ENES Data Space
- **1,703 participants** in total

EXPLOITATION: Users per country (total = 49,000)

No. of new registered users (during M01-M15)

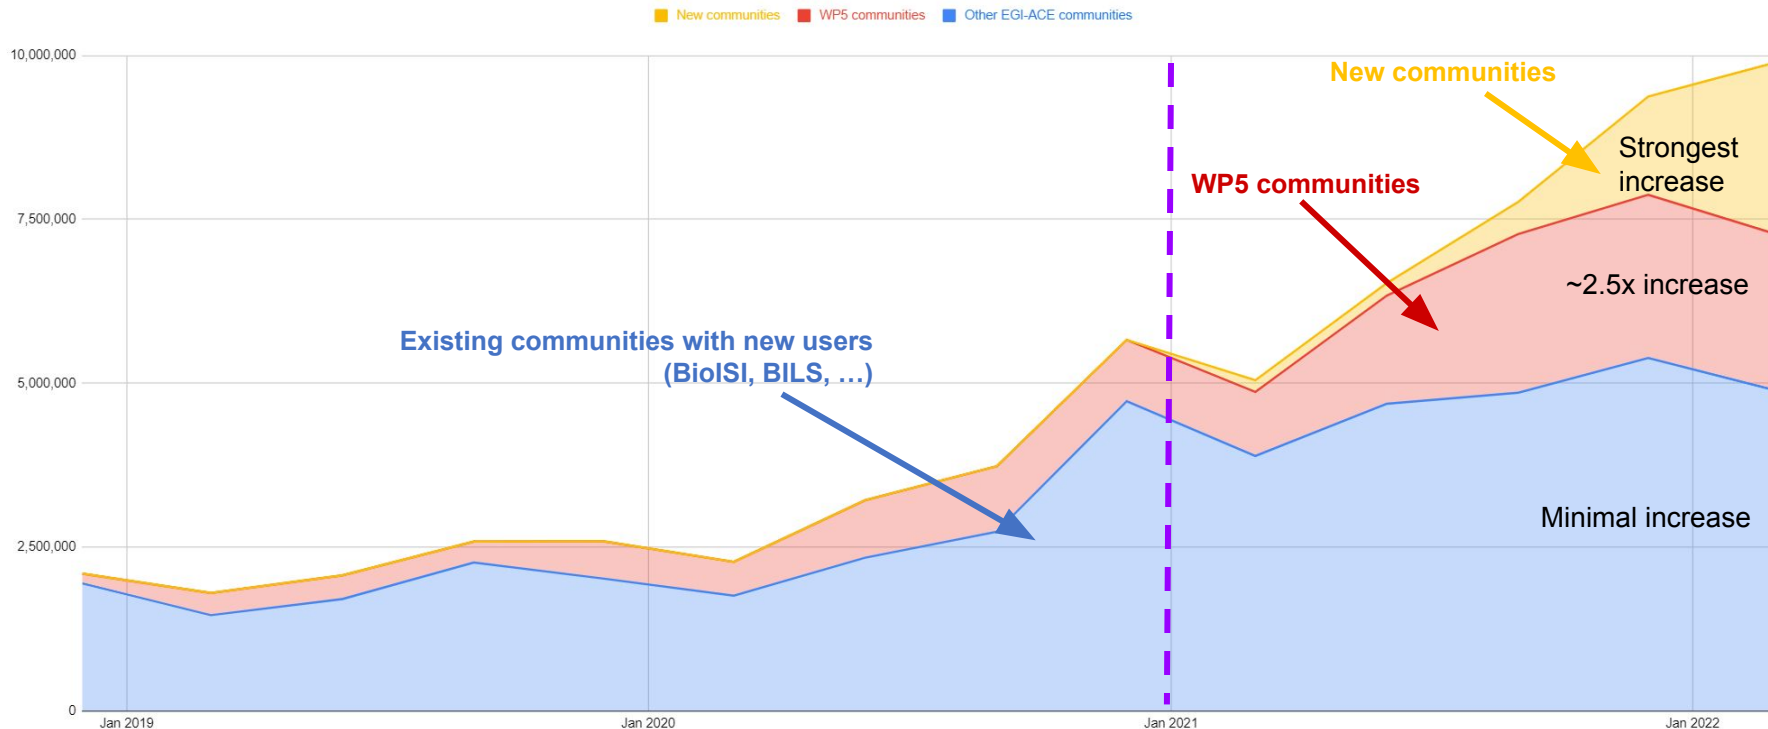

Thematic Service	Baseline	Metrics at M15	%
WeNMR	4,500	8,056	+41%
VIP	1,000	1,388	+11%
OpenRiskNet/NanoCommons Virtual Environment	100	In development stage	
useGalaxy.eu	20,000	48,000	+92%
OPENCoastS	250	316	+54%
ENES Data Space	40	Registered in EOSC recently	
PROMINENCE	3	4	+33%
LOFAR Science Product	0	Registered in EOSC recently	
SeaDataNet WebOcean Data Analysis	100	In development stage	

No. of new registered users (during M01-M15)

Thematic Service	Baseline	Metrics at M15	%
EMSO-ERIC Data Services	200	1,977	+690%
GBIF Cloud data space	8,031	Registered in EOSC recently	
Disaster Mitigation & Agriculture	150	EOSC registration in progress	

IMPACT: Cloud CPU-hour use by Thematic Services

Start of EGI-ACE

35 M cloud CPU hours delivered since Jan 2021
(VA+national+pay4use)

FUTURE PLAN

Plan for the next period

- Complete the integration of the **SeaDataNet**, **OpenRiskNet** Data Spaces and **Disaster Mitigation and Agriculture** Thematic Service in the EOSC Compute Platform.
- Increase **outreach and dissemination activities** to promote the services uptake.
- Ensure long term support for user facing activities
EOSC procurement, Lot 4 as possible funding source

Final take-away from KER3

22 Thematic Services supported

18 Thematic Services in production (WP5+T2.3)

4 Thematic Services in development stage

VIP and WeNMR are operating production services

EMSO-ERIC moving in production

~49,000 users served

20M Cloud and HTC CPU/h allocated

+25 PB of Open Data shared by the Thematic Services

30 training events organized (including **2** webinars)

Thank you!

EGI-ACE receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 101017567.

Backup slide

BRIEF DESCRIPTION

- **Thematic Services = Data Spaces + Processing Platforms**
- **Data Space** is a public collection of FAIR, quality data and related resources consumed, produced and provided by identified participants, each respecting societal values and operating within an explicit framework of trust and governance
- **Processing Platforms** do not store and manage data for users
 - Users can upload (or define) input data, define/select data analysis/transformation steps, then download the results after the computation is finished.

FAIR maturity of the EGI-ACE Data Spaces

FAIR Data Maturity Model: specification and guidelines from the RDA FAIR Data Maturity Model WG

<https://zenodo.org/record/3909563>

The FAIR Data Maturity Model includes **47** indicators:

- **7** for the **F**indable, **12** for the **A**ccessible, **12** for the **I**nteroperable, and **16** for the **R**eusable aspect.
- **3** priorities for each Indicator: **Essential**, **Important** and **Useful**
- Each indicator can be evaluated as **TRUE**, or **FALSE** for the object that is in the focus of the assessment.

Data Space	Findability (F)	Accessible (A)	Interoperable (I)	Reusability (R)
useGalaxy.eu	100% Compliant	82% Compliant	86% Compliant	89% Compliant
GBIF	100% Compliant	100% Compliant	86% Compliant	100% Compliant
ENES	71% Compliant	91% Compliant	100% Compliant	100% Compliant
LOFAR Science Project	100% Compliant	100% Compliant	57% Compliant, but working on it	78% Compliant
EMSO ERIC	100% Compliant	91% Compliant	14% Compliant, but working on it	66% Compliant
SeaDataNet	100% Compliant	100% Compliant	100% Compliant	100% Compliant
