Participants

1. Alison Packer (STFC)
2. Alvaro Simon (JRA1)
3. Daniele Cesini (JRA1)
4. Emir Imamagic (JRA1)
5. Giacinto Donvito (IGI)
6. Ivan Diaz (CESGA)
7. Miroslav Ruda (CESNET)
8. Tomasz Szepieniec (Cyfronet)
9. Matteo Turilli (OeRC)
10. Michael Higgins (CloudSigma)
11. Peter Solagna (IGI)
12. Piotr Kasprzak (GWDG)
13. Stuart Kenny (TCD)
14. David Wallom (OeRC)
15. Zeeshan Ali Shah (KTH/Venus-C)
16. Domenico Vicinanza (DANTE)
17. Mattieu Puel (IN2P3)

1 TF member connected during the conference but no credential were registered.

Apologies

1. Elisabetta Roncheri (INFN).
2. Michel Drescher (EGI.eu).
3. Marco Verlato (WeNMR).
4. Björn Hagemeier (FZJ).

Agenda approval

There were no changes to the proposed agenda.

Minutes from the previous meeting approval

The minutes (<https://www.egi.eu/indico/event/592>) were accepted without changes.

Actions review

Please note that the actions are now managed with the help of the to-dos lists at the following Basecamp website: <https://oerc.basecampHQ.com/>.

Agenda

Scenario 4 report

- Feedback from the providers is needed:
 - what information they are collection for account at the moment;
 - what information they intend to collect in the future.

The goal is to to reach a common language about cloud accounting shared among the community of our Resource Provider. On these bases, the accounting system capabilities will be defined.

- This review and discussion process will be the core topic for the upcoming F2F meeting (Action 3/11).
- Start to document the Scenario progress on the wiki (Action 2/11).

Scenario 5 report

- There are three volunteers for a pilot Nagios installation (CESGA, JR1 and OeRC).
- Once the Nagios instances will be available, the workgroup will develop an initial set of simple probes.

- It has been clarified that the monitoring activity involves only the cloud infrastructure not the internal status of the VMs that are running on it.
- The progress of the Scenario should be documented on the wiki (Action 4/11), including design details about the probes and the parameters that they should monitor (Action 5/11).

Scenario 6 report

- The work plan for the Scenario has been documented on the wiki at: <https://wiki.egi.eu/wiki/Fedcloud-tf:WorkGroups:Scenario6>
- Volunteers are needed to provide details about what information systems available for each cloud platform used by the TF Resource Providers. KTH, CloudSigma and INFN have volunteered to provide details respectively about OpenNebula, CloudSigma and WNoDeS (Actions 7,8,9/11).
- The development of the work plan outlined on the wiki will be the core topic discussed at the F2F meeting (Action 10/11).

Scenario 2 report

- Work is ongoing about testing the data capabilities. More details should be provided after the F2F meeting.
- The VM image used for testing the Scenario 1 capabilities will be used also to run the tests for Scenario 2.

F2F meeting, Amsterdam

The participants to the call were satisfied with the details available about the venue and the agenda for the F2F meeting.

AOB

The Chair has reported about:

- how the progress of a Scenario is evaluated and what are the milestones that should be achieved by each scenario;
- the new structure of the wiki and the information displayed on the home page about the activity of each institution member of the TF.

Minutes prepared by Matteo Turilli.
