EGI Workload Manager Service: activities in the EGI-ACE project

Wednesday, 21 June 2023 10:30 (20 minutes)

The EGI Workload Manager Service (WMS) is based on the DIRAC interware, offering a complete software solution for communities of users that need to exploit distributed, heterogeneous computing and storage resources for big data processing. This presentation will give an overview of the service and then focus on the WMS functionalities supporting the current trends and technology innovations in the framework of the EGI-ACE project. A dedicated training session is foreseen during the conference for the interested users.
