Dataspaces and AI/ML services in the agricultural domain

Wednesday, 21 June 2023 12:30 (1 hour)

In this session we will present several ongoing initiatives that are related with creation of the Agriculture dataspaces. We will present as well the selected AI/ML focused projects that will contribute to the Dataspaces

Introduction to the dataspaces in Agriculture - AgriDataSpace project (Raul Palma - PSNC)

Building the Agriculture data Space in Poland - eDWIN and Datamite project (Maciej Zacharczuk - WODR)

Building the AI Testing Experimental Facilities in agriculture and contribution to agriculture dataspaces - AgriFoodTEF project (Łukasz Łowiński - PIT)

Agriculture AI based use cases in the ICOS and AI4EOSC projects(Marcin Plociennik - PSNC)

Platform for yield and cost prediction of agricultural production - PRAGMATIC (Tomasz Wojciechowski - PULS)
