Green Computing

Wednesday, 21 June 2023 14:00 (1 hour)

This session will host presentations and discussions about recent activities and achievements on lowering the environmental impact of computing and analysis of Big Data within EGI Federation. It will include findings of the EGI-ACE Green Computing Task Force - good practice and knowledge dissemination undertaken by project partners, also will showcase the solutions taken to reduce the environmental impact of a Cloud site part of EGI Federated Cloud.

Last but not the least, based on results and achieved experience, a potential roadmap to go further 'green' will be recommended to be implemented across data centres within the Federation, including how data centres can be influenced to support the adoption of 'Green IT' across their estate.
