Towards a sustainable funding for EOSC

Wednesday, 21 June 2023 17:00 (1 hour)

This session will briefly present the results of the consultation survey of the EOSC Association Financial Sustainability Task Force which collected the EOSC community's views on proposals for the financial sustainability of EOSC. Key members of the EGI community will discuss the results' relevance to and alignment with business models for EGI.

The session will discuss topics including the EOSC Core, EOSC Exchange and the federation of data in EOSC.

Participants will have the opportunity to engage in discussion about EGI's business models and their alignment with potential EOSC business models, consequences for EGI of choices made for EOSC business models, and consequences for EOSC of EGI's business models.

The survey was developed to ask the EOSC community about their views on the proposals for the financial sustainability of the main components of EOSC - EOSC Core, EOSC Exchange and Data Federation in EOSC - described in the Financial Sustainability Task Force's interim progress report Towards Sustainable Funding Models for the European Open Science Cloud, published in November 2022.
