EGI Digital Innovation Hub - Delivering value to the private sector

Thursday, 22 June 2023 11:00 (1 hour)

EGI DIH is the Digital Innovation Hub created by EGI in 2022 to stimulate the collaboration of EGI with the private sector, formalising years of experiences supporting companies in innovation activities. The EGI DIH offers companies the possibility to join its community via different levels of engagement and where valuable services at technical, networking, training and funding level will be facilitated as part of the value proposition of the EGI DIH.

The session will present the EGI DIH to the audience, with the participation of one of the success stories where we will learn the experience of the Finish company Binare IO working with the EGI DIH. Later Aruba, an active collaborator of EGI, will participate as an invited speaker presenting its commercial cloud service to the community.
