Polish Data repositories for EOSC

Thursday, 22 June 2023 16:30 (1h 15m)

Presents use cases of European and national data repositories which use the research infrastructure of National Data Storage (NDS) in Poland, among others biology, digital humanities, astrophysics data.

NDS provides a platform for open science repositories supporting the EOSC approach in Europe.

The session will include 4 presentations of application use cases from different science disciplines and presentation of the data services provided via NDS platform.
