

EuroScienceGateway

Wednesday, October 2, 2024 5:35 PM (20 minutes)

EuroScienceGateway leverages a distributed computing network across 13 European countries, accessible via 6 national, user-friendly web portals, facilitating access to compute and storage infrastructures across Europe as well as to data, tools, workflows and services that can be customized to suit researchers' needs.

In this talk present the work carried out in the project during the last year, including integration of the EuroScienceGateway with new Identity Providers, Bring your Own Compute (with Pulsar and ARC), Bring your Own Storage (with S3 and Onedata) and improvements in the metascheduling of jobs across the distributed computing infrastructure.

Topic

Presenter: LUNA VALERO, Sebastian

Session Classification: Simplifying Data-Driven Science with User-Friendly Platforms and Gateways
