

cesnet – Activity Overview

Zdeněk Šustr
sustr4@cesnet.cz

GreenDigit

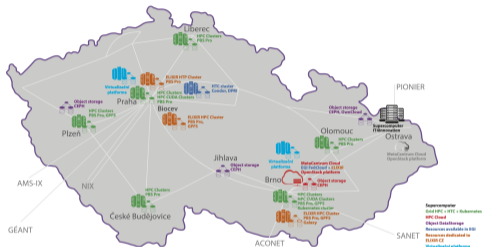

GreenDigit

- **Software Stack** (available for Green Digit pilot)
 - OpenStack
 - Kubernetes
 - Batch system
 - ▶ mostly PBS, national user base
- **Geographical distribution**
 - Different distributors – various conditions
 - Ideal testing ground – every site has a different energy grid operator

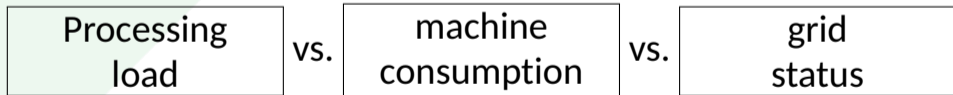

Introduction

Focus in Green Digit

- National/regional market dynamics
 - Spot prices
 - Renewable share/availability
- Monitoring energy grid parameters in the context of actual workload

- Histories and trends
- Evaluation of available tools

Thank you for your attention
