Most common Core integration

1. Understand and define main use cases (user-centric perspective) for the AAI integration that we want to support in the project

   a. AAI int Use case1: As a Pilot node I want to integrate a number of services with EOSC so my users can…

   b. AAI int Use case2: want to integrate a number of services with EOSC Innovation sandbox to test Sandbox capabilities

   c. …

2. Break down the use cases into necessary technical and operational steps, map them to AAI core services

   a. For AAI int use case2

      i. a single Pilot rep needs to log in in the sandbox using their credential

      ii. fill in the provider form

      iii. wait for acceptance

      iv. …

3. Connect Pilot nodes with the use cases

4. Conduct the same exercise for other Core Services (during WP15 meetings)

Most common user story

How do we imagine in? (user-centric perspective, provider perspective)
