PRACE –Introduction and Overview

Wednesday, 28 March 2012 11:00 (30 minutes)

Thomas Eickermann: PRACE –Introduction and Overview

The Partnership for Advance Computing in Europe (PRACE) is the European HPC Research Infrastructure, providing high-end HPC services to European researchers from academia and industry. This presentation will give a general overview of PRACE, covering its mission, objectives, governance and funding, resources and services, as well as the status of implementation and future directions.
