EGI - ESFRI and related projects workshop

Tuesday, 27 March 2012 14:00 (1h 30m)

Description of the Work

ENVRI is a cluster project for the benefit of environmental Research Infrastructures, which are listed on the current ESFRI (European Strategy Forum on Research Infrastructures) Roadmap: EMSO, EURO-ARGO, ICOS, LIFEWATCH, EISCAT_3D, EPOS, and SIOS. The central goal of the ENVRI project is to implement harmonised solutions and generate guidelines for the common needs of all the environmental ESFRI projects, with a special focus on such issues as architectures, metadata frameworks, data discovery in scattered repositories, visualisation and data curation.

Conclusions

Engagement with ESFRI projects

Impact

Extension of the EGI user community

Overview (For the conference guide)

A workshop to explore the impact of EGI service offering on the ENVRI community

Primary author: Dr FERRARI, Tiziana (EGLEU)

Session Classification: ESFRI, cluster and related projects workshop
