

Minutes COD phone conf 17-11-2011

Present: Marcin Radecki, Malgorzata Krakowian and Ron Trompert

Communication with COO

We all agree that GGUS should be used for requests to the COD. Brainstorming can take place though other media like jabber or skype. Malgorzata suggests to setup an ad-hoc meeting room in skype.

Review of action items

On https://wiki.egi.eu/wiki/Grid_operations_oversight/CODOD_actions#Open_Actions there is a wiki with all action items for the COD. Malgorzata discusses all of these. A number of these action items will be discussed later on in these minutes. Apart from these issues, Malgorzata will be taking a look at GGUS 76260. Names have been put after all action items. A link to the GGUS tickets will also be put on this page.

Unknown Issue

Ron discusses the information on the wiki page that Malgorzata has put together. There are still questions regarding the UNKNOWN status. We agree that before we move forward on this subject, we first setup a phone conf with Emir. After that, we will decide on how to proceed.

A/R probe

The COD has been asked to maintain the A/R probe. We will not do this. We feel that this is a responsibility for JRA1 as described under task JRA1.2.6 in the DoW. The probe is already there. NGI_PL and NGI_NL will test this. Ron will ask 3rd NGI to join. In the phone conf with Emir we can discuss how to proceed with this.

Newsletter

Topics:

- A/R probe (RT)
- BDII followup (RT)
- ROD metric reports (MK)
- tips closing non-OK alarms (RT)
- new flow image PROC01 (MK)

Deadline: November 25th
