

Service Development breakout groups

Tuesday, 24 January 2012 16:00 (1h 30m)

Service development responsibilities will be discussed under the following topics:

Community-specific services

Common front-end services: interfaces, portals, gateways, APIs and apps

Services to access infrastructure resources

Back-end services: monitoring, accounting , metering and reporting

The conveners should spend 15 minutes ensuring that they have captured information in the spreadsheet provided and have produced any further slides summarising the discussions if required.

Session Classification: Breakouts - Service Development
