

COD: update on site suspension cases May-June

Marcin Radecki
on behalf of COD

OMB 27.07.2010

- Non responsive ROCs/NGIs:
 - Russian ROC (GGUS #59818)
 - No ROC representative at EGI OM on 26.07
- Non responsive sites:
 - SWE ROC: DI-UMinho (GGUS #59816)
 - <50% A/R
 - Site agreed to be suspended
 - SEE ROC: MK-o2-ETF (GGUS #59818)
 - A/R <70% (the same in June)
- COD **will not open** site suspension tickets related to May report, we start it from July (deadline for replies 2.08)

- Non responsive sites
 - sites had some problems which resulted in low A/R figures (and)
 - sites failed to answer ticket for 7 working days (and)
 - NGI was not able to contact with the site and provide reasonable justification

Suggestion is:

to suspend sites which did not answer at all.

- No objections received at EGI Operations Meeting
- Remark from NGI_IBERGRID: Seems like A/R figures are not computed correctly for sites being certified in the middle of the month (low figures observed, seems like time denominator for A/R computation is the whole month, not the part of month since when they were certified).
