

ENVRI/EISCAT-3D

Ingemar Haggstrom (EISCAT3D), Malgorzata Krakowian (EGI.eu), Salvatore Pinto (EGI.eu)

Abstract

Printable summary: Data Catalogue and Dissemination Platform-as-a-Service is being provided by EGI to EISCAT, which integrates Cloud Computing (Infrastructure-as-a-Service) and Cloud Storage (Storage-as-a-Service). The usage of Cloud resources ensures the flexibility needed by the EISCAT 3D project to cope with large data volumes and thanks to Platform-as-a-Service solution the community can use a simple Web Interface to manage the system, upload files, etc..., removing the need to directly access the API of the Cloud Storage and Computing service. The demo will show current EGI set up of PaaS for EISCAT community.
